Hello

I am writing to express my concern for the planned development at 156 West End Lane

Looking at the current plan, I am concerned in particular about

- the very high density of lodgings which will result in more congestions on the streets and on the pedestrian access to/from public transports
- the high level of the buildings overlooking the main street which create an other eyesore on West End Lane
- increased traffic during and after construction in a road already heavily congested and with crossings used by many children
- the very substantial number of new applications granted around West End Lane which has already seen the completion of at least three major real estate developments built in less than 2 years next to the two railway lines and within 200 yards of the planned development

I trust you will take my comments into consideration before giving your final views on this plan

Best regards

Marc Nahum
