Subject: 2016/4940/P 26 Lyndhurst Road

Dear Sir,

Further documents have been posted on Camden's website indicating that these trees are now not for removal.

I am still very concerned.

The newer Tree Protection Report does not require hand digging of the path and wall which is essential if these fine yew trees are to be protected. Neither is there any indication in 2016/4940/P or 2015/2548/P as to how these trees are to be protected from deliveries and from machinery.

Please would you refuse this application and ask for adequate tree protection measures to be written into the Construction Management Plan mentioned in the section 106.

Vicki Harding
