As Freeholders we will never agree for the installation of any lift or for changing the layout of the staircase to accommodate a lift.  It is legally not viable for them to endanger the life of the tenants of the upper flats by constructing their new flats because the structure of the building will not be able to take the extra loading. My structure engineer and architect can confirm this.  There is also not enough parking for the current flats and extra space on the roof will affect the lights to the current flats and to the front gardens and to the neighbours.  Also this building was built in the 1960s and it is uniquely built in a way to reflect the era and it is within the conservation area. Building an extra floor will change the look of the building and the conservation area.  Building flats like this does not improve the area or the building or the livelihood of the 12 flats.  Because of the above reasons I object strongly for the building of this extra floor which is going to affect the livelihood of all the tenants and neighbors and surrounding nature.  Please do not hesitate to contact me for further information.  Haleem Kherallah [REDACTED] Flat 4 Manor Court Parkgreen Estate Ltd
