

Bedford Place

No.	Count / Species	Works	Priority / Safety action date	Date completed
23	1 x <i>Cotoneaster sp.</i> Tree Cotoneaster	Fell - Ground level remove stump to facilitate replacement planting Plant replacement tree	1 year 19/09/17 1 year 19/09/17	
24	1 x <i>Pittosporum tenuifolium</i> Missing Species	Lift low canopy - Pedestrian clearance lift to 2.5m over footpath and neighbouring property	1 month 20/10/16	

Bedford Place 38a

No.	Count / Species	Works	Priority / Safety action date	Date completed
25	1 x <i>Ailanthus altissima</i> Tree Of Heaven	Deadwood - Remove	6 months 24/03/17	

Bedford Square

No.	Count / Species	Works	Priority / Safety action date	Date completed
79	1 x <i>Platanus x hispanica</i> London Plane	Deadwood - Remove remove deadwood @ approximately 14m to the north west, examine and photograph for Massaria colonisation	6 months 25/03/17	
80	1 x <i>Platanus x hispanica</i> London Plane	Deadwood - Remove remove deadwood at approximately 17m to north east	6 months 25/03/17	
82	1 x <i>Platanus x hispanica</i> London Plane	Reduce crown by - Specified extent reduce crown to previous reduction points remove deadwood Detailed investigation - Internal decay PiCUS and/or Resistograph investigation at base to determine consistency of remaining wood and inform future management decision Remove debris / vegetation to allow trim nearby shrubs to allow access around the base for decay investigation	6 months 25/03/17 6 months 25/03/17 6 months 25/03/17	
83	1 x <i>Platanus x hispanica</i> London Plane	Deadwood - Remove remove deadwood (Massaria) to the north over flowerbed	6 months 25/03/17	
84	1 x <i>Platanus x hispanica</i> London Plane	Reduce lateral limb / limbs reduce lateral branches to the south over road by approximately 4m, to relieve loading and minimise risk of failure remove deadwood	6 months 25/03/17	
87	1 x <i>Platanus x hispanica</i> London Plane	Remove faulted limb / limbs remove damaged limb at approximately 12m to the north over footpath, and any other deadwood	6 months 25/03/17	

89	1	x	<i>Platanus x hispanica</i> London Plane	Reduce lateral limb / limbs reduce lower lateral branches to east by approximately 4m, to suitable growth points to reduce weight and likelihood of branch failure over road, reduce height by approximately 2-3m to balance crown, remove deadwood	6 months 25/03/17
90	1	x	<i>Platanus x hispanica</i> London Plane	Reduce crown by - Specified extent reduce height of taller stems to appropriate point at similar height to central stem (by approximately 5-6m) to minimise risk of stem/branch failure over road and seats Detailed investigation - Internal decay PiCUS and/or Resistograph investigation at base to determine consistency of remaining wood and inform future management decision Remove debris / vegetation to allow trim nearby shrubs to allow access around the base for decay investigation	1 year 20/09/17 6 months 25/03/17 6 months 25/03/17
92	1	x	<i>Platanus x hispanica</i> London Plane	Reduce lateral limb / limbs reduce lower lateral branches to north and west by approximately 3-4m, to suitable growth points to reduce weight and likelihood of branch failure over road and footpath	6 months 25/03/17
93	1	x	<i>Platanus x hispanica</i> London Plane	Reduce lateral limb / limbs reduce heavy, lower lateral branches to north, east and south by approximately 3-4m, to suitable growth points to reduce weight and likelihood of branch failure over road and footpath, remove damaged/decayed wood to the north at approximately 16m	6 months 25/03/17
94	1	x	<i>Platanus x hispanica</i> London Plane	Reduce lateral limb / limbs reduce heavy, lower lateral branches to south by approximately 4m, to suitable growth points to reduce weight and likelihood of branch failure over footpath and seating	6 months 25/03/17
95	1	x	<i>Platanus x hispanica</i> London Plane	Reduce lateral limb / limbs reduce lower lateral branches to north and west by approximately 4m, to suitable growth points to reduce weight and likelihood of branch failure over road	6 months 25/03/17
102	1	x	<i>Ulmus glabra</i> Wych Elm	Lift low canopy - Pedestrian clearance lift to 2.5m over footpath, remove broken branches	1 month 21/10/16
107	1	x	<i>Ilex aquifolium</i> Holly	Lift low canopy - Pedestrian clearance lift to 2.5m over footpath	6 months 25/03/17
109	1	x	<i>Ilex aquifolium</i> Holly	Prune from adjacent structure cut back to clear lamp column by 1m lift to 2.5m over footpath	6 months 25/03/17
114	1	x	<i>Ilex aquifolium</i> Holly	Lift low canopy - Pedestrian clearance lift to 2.5m over footpath	6 months 25/03/17

115	1	x	<i>Laurocerasus lusitanica</i> Portugal Laurel	Lift low canopy - Pedestrian clearance lift to 2.5m over footpath	1 month 21/10/16
118	1	x	<i>Ilex aquifolium</i> Holly	Lift low canopy - Pedestrian clearance	6 months 25/03/17
133	1	x	<i>Ilex aquifolium</i> Holly	Lift low canopy - Pedestrian clearance lift to 2.5m over footpath	6 months 25/03/17
142	1	x	<i>Ulmus glabra</i> Wych Elm	Detailed investigation - Internal decay PiCUS and/or Resistograph investigation at approximately 2m to determine consistency of remaining wood and inform future management decision Remove debris / vegetation to allow clear away basal and vegetation to facilitate detailed inspection at base Reduce crown by - Specified extent reduce height and branch length by approximately 2m to reduce wind loading and minimise risk of trunk failure	6 months 25/03/17 1 month 21/10/16

Gower Street

No.	Count	Species	Works	Priority / Safety action date	Date completed
72	1	x <i>Platanus x hispanica</i> London Plane	Lift low canopy - Specified extent lift on west to clear building by 2m	6 months 25/03/17	
73	1	x <i>Platanus orientalis</i> Oriental Plane cv.	Lift low canopy - Specified extent lift on west to clear building by 2m, remove deadwood	6 months 25/03/17	

Montague Street

No.	Count	Species	Works	Priority / Safety action date	Date completed
5	1	x <i>Catalpa bignonioides</i> Indian Bean Tree	Prune from adjacent structure prune branches to south to clear structure by 1m, remove deadwood	1 year 19/09/17	
6	1	x <i>Liriodendron tulipifera</i> Tulip Tree	Reduce lateral limb / limbs reduce lower lateral branches to the east by approximately 1.5m to address conflict with neighbouring holly tree, and remove deadwood	6 months 24/03/17	
7	1	x <i>Catalpa bignonioides</i> Indian Bean Tree	Deadwood - Remove	1 year 19/09/17	
11	1	x <i>Cerasus avium</i> Wild Cherry	Deadwood - Remove remove deadwood and pruning stubs	1 year 19/09/17	
12	1	x <i>Catalpa bignonioides</i> Indian Bean Tree	Reduce heavy branch weight reduce lateral branch length on major limb to the north(with decay attachment point) by 2-3m, to suitable growth points - to relieve loading, remove deadwood	6 months 24/03/17	
14	1	x <i>Ailanthus altissima</i> Tree Of Heaven	Reduce crown by - Specified extent reduce height and branch length by approximately 3m to reduce loading on stems with decay pockets and minimise risk of branch failure, continuing established management	1 year 19/09/17	

15	1	x <i>Ailanthus altissima</i> Tree Of Heaven	Reduce crown by - Specified extent reduce crown to previous reduction points, continue established management, relieve loading on limbs with decay and minimise risk of branch failure	1 year 19/09/17
16	1	x <i>Crataegus monogyna</i> Common	Deadwood - Remove remove hanging branches over flowerbed by neighbouring property	6 months 24/03/17

Ridgmount Gardens

No.	Count / Species	Works	Priority / Safety action date	Date completed
50	1 x <i>Cotoneaster sp.</i> Tree Cotoneaster	Lift low canopy - Pedestrian clearance lift to 2.5m over footpath	6 months 24/03/17	
53	1 x <i>Robinia pseudoacacia</i> Golden False Acacia	Deadwood - Remove	6 months 24/03/17	
56	1 x <i>Amelanchier lamarckii</i> Snowy Mespilus	Lift low canopy - Pedestrian clearance lift to 2.5m over footpath	6 months 25/03/17	
63	1 x <i>Amelanchier lamarckii</i> Snowy Mespilus	Lift low canopy - Pedestrian clearance lift to 2.5m over footpath remove deadwood	6 months 25/03/17	
66	1 x <i>Cotoneaster sp.</i> Tree Cotoneaster	Lift low canopy - Pedestrian clearance lift to 2.5m over footpath	1 month 21/10/16	
67	1 x <i>Cotoneaster sp.</i> Tree Cotoneaster	Lift low canopy - Pedestrian clearance lift to 2.5m over footpath	1 month 21/10/16	
70	1 x <i>Cotoneaster sp.</i> Tree Cotoneaster	Lift low canopy - Pedestrian clearance lift to 2.5m over footpath	6 months 25/03/17	
71	1 x <i>Liquidambar styraciflua</i> Sweet Gum	Reduce crown by - Specified extent reduce height by 2m to relieve loading on cracked fork	1 year 20/09/17	

Southampton Row

No.	Count / Species	Works	Priority / Safety action date	Date completed
26	1 x <i>Tilia cordata</i> Small Leaved Lime	Climbing plant - Sever clear away ivy to 2m to facilitate detailed inspection at base, tidy up pruning stubs	1 year 19/09/17	
27	1 x <i>Cerasus avium</i> Wild Cherry	Reduce lateral limb / limbs reduce lowest lateral branches to the west (over neighbouring property) by approximately 3m to minimise risk of failure. Remove pruning stubs and deadwood	1 year 19/09/17	
29	1 x <i>Ailanthus altissima</i> Tree Of Heaven	Climbing plant - Sever clear ivy and vegetation to enable inspection of base during next annual survey	1 year 19/09/17	
32	1 x <i>Crataegus monogyna</i> Common	Climbing plant - Sever clear away ivy to 2m to facilitate detailed inspection at base	1 year 19/09/17	
33	1 x <i>Aesculus hippocastanum</i> Horse Chestnut	Reduce lateral limb / limbs reduce lateral branch length by approximately 2m to suitable growth points to relieve loading and minimise risk of failure	1 year 19/09/17	

36	1	x	<i>Acer pseudoplatanus</i> Sycamore	Fell - Ground level	1 year 19/09/17
37	1	x	<i>Platanus x hispanica</i> London Plane	Reduce lateral limb / limbs reduce heavy lateral branches to the north and south by approximately 4m and lateral branches to east and west by approximately 2m to relieve loading and minimise risk of failure sever and strip climber from upper crown	1 year 19/09/17
46	1	x	<i>Fraxinus excelsior</i> Ash	Climbing plant - Sever clear away ivy to 2m to facilitate detailed inspection at base	1 year 19/09/17
