

Dear Tessa,

Many thanks for your visit this morning to hear my concerns regarding the proposals ref 2016/4971/P and to see for yourself the effects on my flat that would follow should the development be granted .

My main concerns are

1/ the large reduction of natural light entering my flat in various rooms: my son' s bedroom and the kitchen on the first floor and on the second floor my daughter's bedroom, the toilet and possibly the bathroom.

2/the detrimental effects of heavy construction work [both below ground level and above] on the infrastructure of my property and the associated noise, mess and general disruption involved. [including HGV lorries coming and going].

3/the resultant lack of privacy and tranquillity due to neighbours congregating on the proposed balcony close to my flat's[bedrooms, bathroom etc....]

4/the proposed gate at the rear of the existing workshop . This would obstruct my access to my gas meter.

5/the fact that this proposed development could take an unlimited number of years to complete.

I look forward to your decision and correspondence regarding these matters.

Yours sincerely

John D. Marr tel [REDACTED]
