Informative(s):

- 1 Reasons for granting permission:

The proposed frontage is considered appropriate for the age and style of the building and the ground floor A2 unit in terms of design, scale and choice of materials and is in keeping with the commercial identity of a Central London high street. The frontage is predominantly glazed with the pilasters, entrance doors and ATM being retained. The fascia boards will be made of stone which are marginally larger than the existing which is considered appropriate. This maintains an active frontage upon the street scene and is considered to preserve enhance the character and appearance of Tottenham Court Road and the Bloomsbury Conservation Area while maintaining the applicant's corporate identity.

The CCTV and alarm systems will remain although will be repositioned slightly from its existing situation which is considered acceptable upon the appearance of the frontage.

Due to the minimal scale of the proposal, there would be negligible harm to the amenity of any adjoining residential occupiers.

No objections have been received prior to making this decision. The applicant site's planning history and relevant appeal decisions have been taken into account when coming to this decision.

Special attention has been paid to the desirability of preserving and enhancing the character and appearance of the Conservation Area, under s.72 of the Listed Buildings and Conservation Areas Act 1990 as amended by the Enterprise and Regulatory Reform Act (ERR) 2013.

As such, the proposed development is in general accordance with policies CS5 and CS14 of the London Borough of Camden Local Development Framework Core Strategy and policies DP24, DP25 and DP26 of the London Borough of Camden Local Development Framework Policies. The proposed development also accords with the London Plan 2016 and the National Planning Policy Framework.
