Subject: Intended works to trees 2016/5804/T

Dear Sirs,
I live in a flat facing these Poplar Trees. They greatly improve the Environment. Without them, I look directly on to the properties facing me.
I note that one is dead, and needs replacing.
I also appreciate that the others need attention, which involves curgtting back from time to time. However, I consider reducing them by 4 to 5 metres to be excessive, and not necessary. I would ask that you recuce this to 2to 3 metres.

Many thanks,

Mabel Sumner
