project name - sheet title
26 WEDDERBURN ROAD - PERMEATION GROUTING METHOD RESPONSE

RE: Approval of Condition 07 (ref: 2013/6418/P) - Grouting Method Statement

To whom it may concern,

We consider the proposed grouting method statement by Tempo PCE as set out in document WR-PI-Q-160504 to be satisfactory. The method proposed takes into account infiltration testing results and grouting test pits carried out on site.
