Informative(s):

- 1 Reasons for granting permission.

The proposed lighting fixtures are acceptable in terms of size, design, location and method of illumination as they would respect the design, scale and historic fabric of the host building. Following officer advice, the proposed light fittings have been changed to traditional fittings and the internal illumination of the projecting sign removed which is considered more appropriate. As such, the signs are not considered to be unduly dominant on the street nor would they harm the Hampstead Conservation Area.

Whilst the advertisements will have some impact in terms of light spill the light fittings are positioned away from the nearest windows and they are not considered to be harmful to the amenity of neighbouring occupiers. The signs are positioned in a typical location on the fascia and are not considered to impact on pedestrian or vehicular safety and therefore raise no public safety concerns.

The site's planning history and relevant appeal decisions were taken into account when coming to this decision. A letter of support was received as a result of consultation.

Special regard has been attached to the desirability of preserving the listed building

and the features of special architectural or historic interest which it possesses. Considerable importance and weight has been attached to the harm and special attention has been paid to the desirability of preserving or enhancing the character or appearance of the conservation area under s.66 and s.72 of the Listed Buildings and Conservation Areas Act 1990 as amended by the Enterprise and Regulatory Reform Act (ERR) 2013.

As such, the proposed development is in general accordance with policies CS5 and CS14 of the London Borough of Camden Local Development Framework Core Strategy and policies DP24, DP25 and DP26 of the London Borough of Camden Local Development Framework Development Policies. The proposed development also accords with the London Plan 2016 and the National Planning Policy Framework.

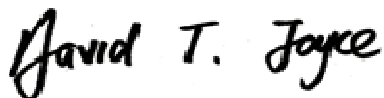

- 2 The intensity of the illumination of the sign shall not exceed the maximum permitted recommended luminance as set out by 'The Institute of Lighting Professional's 'Professional Lighting Guide 05: The Brightness of Illuminated Advertisements'.

In dealing with the application, the Council has sought to work with the applicant in a positive and proactive way in accordance with paragraphs 186 and 187 of the National Planning Policy Framework.
