2016/6108/P	Harry Stobart	68 Solent Road	02/12/2016 14:26:31	INT	As neighbours we are concerned about and object to the proposed roof extension at the rear which would involve the raising of the party wall to accommodate the extra room. We have had coping slabs and flashing installed to stop rain water seeping into the party wall and are concerned that the elevation of the party wall would leave gaps for rain to seep in again. We also have doubts that the party wall has the strength to sustain the extra joists which would be required for the proposed extension.
