- Existing tree or group colour referenced in accordance with BS 5837 2012
- Green - Category A trees of high quality and value
- Blue - Category B trees of moderate quality and value
- Grey - Category C trees of low quality and value
- Red - Category U trees that are dead or showing irreversible signs of decline
- Tree to be removed
- Indicates tree not shown on topo., location not accurate
- Root Protection Area adjusted with consideration of restricting structures
- Site hoarding to form tree protection barriers
- Areas within RPA but outside tree protection barriers where all work will conform to AMS
- Areas suitable for project office and facilities
- Existing foundation to be retained

Arboricultural notes

To safeguard the healthy retention of trees it is essential that agreed protection measures are adopted and adhered to throughout construction processes. The Arboricultural Method Statement gives full details of such measures and must be included as part of tender documents and adhered to.

Key works where the AMS must be referred to:

- Tree Works
- Tree Protection Barriers/Hoarding
- Demolition
- Ground Works/Crane use, Drummond Crescent elevation
- Scaffolding within RPA
- Dismantling Tower Cranes
