

I am writing to file my official objection to the proposal.

The effect on quex road will be huge as it has narrow pavement.

Further more it would cause distraction to drivers.

The signage will cause nuisance as it is a much quiet street as compare to high road.

It will increase traffic and create grid lock on quex road at junction having health and safety Impact

We already had one fatality at the junction in past and it was due to distraction.

There will be loads of impact on the residents of the quex road.

I hope all these matters would be Strickly looked on their merits rather than no of objection as this approval will change the face of quex road. We would also mention that the light permission was so given to merlin house that has already created nuisance as the lights are bright and have environmental impact.

Kind regards  
Kash
