This Section 73 application therefore seeks to amend the drawing revision numbers listed in condition 2 in accordance with the drawings listed above in Table iii.

Front Elevation

- Insertion of a wider double front door
- Slight narrowing of first floor windows to take account of wall construction

Rear Elevation

- Metal frames for all openings at ground floor level and central window at first floor
- Widening of windows at first floor

Side elevations

- Blanking out of first floor windows facing no. 16 Lancaster Grove
- Narrowing of first floor window facing no. 22 Lancaster Grove
- Removal of chimney pots

First and Second Floors

- Reflects alterations to windows

No other changes are proposed to the development.

The amendments have taken full consideration of the comments made by the Council's Conservation Area and the majority of the windows have been maintained as timber framed. The alterations to the side elevations comprising the blanking out for the first floor windows facing no. 16 are a result of the room layouts proposed. These windows are not required and each of the bedrooms these windows served will be adequately lit. The design ensures that interest to these elevations will be maintained and their removal will also remove the risk of overlooking of the neighbouring property.

I trust this application provides everything you need for its assessment however if you require any further information or clarification, please do not hesitate to contact me at your earliest convenience. I look forward to discussing these proposals with you as soon as you have had the opportunity to review the submitted material.

Yours sincerely
