2016/6194/P	Jonathan Evans	Apt. 305 9A Clerkenwell Road London EC1M 5PW	21/12/2016 15:26:35	OBJ	<p>Dear Sirs</p> <p>I am a long-standing patient of the clinic and write these comments in objection to the above application for planning permission.</p> <p>I am a nervous patient and have been regularly using this practice for treatment for over 7 years.</p> <p>The design of the practice and especially the skylight above the chair when I am treated makes the experience less terrifying and a positive one.</p> <p>I find it hard to access a practice locally and especially one that is open evenings and on Saturdays for treatment. When I also need advance treatments (e.g. periodontal), they have a large in-house team so I do not need to go anywhere else.</p> <p>They also provide community events for everyone such as cancer screening on oral cancer day which I have found beneficial.</p> <p>After looking at plans the relocation to the basement would be dingy and as an anxious patient this would be concerning. Also, having to go through the communal reception area would be cumbersome before reaching the clinic and make access harder. Most importantly I would be without a healthcare provider for a period of time if the plans were given the go ahead and I am not sure that being treated in a basement is beneficial for an anxious patient.</p> <p>I strongly object to the application for planning permission as a patient and as a local community resident.</p> <p>Should you require any further information about this objection, please do let me know.</p> <p>Yours faithfully</p> <p>Jonathan Evans</p>

2016/6194/P	John Burton	17 Barry Avenue London N15 6AD	21/12/2016 21:48:42	OBJ	<p>I am a customer of the current dentist and object to the proposals. Moving the D1 unit to the basement will be detrimental to that type of business as the current ground floor location works very well in relation to customers arriving, waiting and being treated. The 3 treatment rooms with skylights work really well for customers as it is very calming to be able to look at the sky when dental work is underway.</p> <p>The plans for the basement area include a skylight which is welcome but that is at the far end of the building and is angled so that overall it will not be easy to incorporate that into treatment rooms where a range of equipment needs to be fitted. It does not look like it will be easy to get the treatment chairs to align with the skylight.</p> <p>Another point is that the current D1 use presents a very active frontage to the street, the movement of customers in and out, the reception staff activity and the full glazed facade all contribute positively and strongly to the vitality of the street.</p> <p>I also have doubts about a shared reception for the whole building. What do the architects mean when they say it will be permanently staffed? Is that 9-5 Monday to Friday? What happens when the operations in the building run outside those hours? For the D1 activity it means they are not in control of their entry door which is a vital part of their operation, in addition to which there may be patients who do not wish to arrive at one reception for the whole building but wish to access the dentist direct (confidence issues or confidentiality issues are rrelevant here).</p> <p>So my belief is that this application if given permission would be detrimental to the running of the D1 business for the reasons outlined above.</p>

2016/6194/P	dr mas hobbi	14 Ornan Road London NW3 4PX	21/12/2016 17:27:12	OBJ	<p>Dear Mr McClue</p> <p>Having natural light in the surgery is a very important matter in my line of work as a dentist.</p> <p>In cases of shade taking for Crowns, fillings or other restorations its paramount that there is natural light in the room for accurate results. I do also believe that having natural light in the surgery is quite important for wellbeing of both clinicians and patients.</p> <p>Yours faithfully</p> <p>Dr M. Hobbi BDS</p>

2016/6194/P	Thomas Heatherwick	356-364 Gray's Inn Road	20/12/2016 17:31:03	COMMNT	<p>For many years now I have been a patient at Dr Minesh Talati's Dental Surgery and in my belief it would be hugely detrimental if the planning application is granted, which will take away the daylight that is so important to the wellbeing of patients. Also, I have a son with Asperger Syndrome who was initially terrified of going to the dentist and I am convinced that the calm and relaxing presence of daylight was an important factor in overcoming this fear.</p> <p>Another concerning factor is that, without the benefit of natural daylight, the colour matching and craftsmanship of dental fillings is likely to be reduced.</p> <p>I therefore hope you will be minded not to approve this planning application.</p> <p>Yours sincerely,</p> <p>Thomas Heatherwick</p>
