2016/6688/T	Consuelo Phelan, hon. Tree Officer, BRA.	54 Belsize Park NW3 4EE	14/12/2016 01:17:17	OBJ	Belsize Residents' Association It seems a shame to remove a mature birch from this garden, where there is only one other existing tree, although it is proposed to plant a quercus ilex at the end of the garden. The dappled shade from the birch would also help to keep the house cooler in hot weather, as the garden is south-facing. Surely if the tree is so large, judicious pruning would be preferable?
