2016/6194/P	Michael Boulis	22 Hayes Road Bromley Kent	23/12/2016 13:33:48	OBJLETTE R	<p>I would like to state how it would seriously affect the quality my work the proposal there is to remove the existing lighting conditions at Malmin Healthcare, Farringdon. I gather this is in relation to development of the upper level of the building, and the implications of this have caused me great concern and distress. As may know already being a dentist with a special interest in prosthodontics necessitates my ability to take a shade for the construction of indirect restorations (such as ceramic crowns, bridges and veneers) in natural lighting conditions. Without natural light taking a shade for these type and other types of aesthetic restorations (such as direct composites) would become very difficult, hence my objection regarding the proposed change to the working environment at Malmin Healthcare.</p> <p>For cases requiring indirect restorations, it is essential that I convey the primary tooth shade characteristics of hue, chroma, and value to the technician who, in turn, produces restorations that match to the remaining dental structure. The presence of natural light at around 5500 Kelvin (CRI 92.2) is essential to do this, and providing artificial lighting conditions to emulate this would be unacceptable for any Prosthodontist who values doing a good job for their patients. I urge you to take seriously the implications the changes in lighting will have for the quality of prosthodontic work I will be able to provide for the patients of Malmin Healthcare.</p>
2016/6194/P	Rahman siddique	Rahman siddiqie Moor house 120 London wall EC2y5et	31/12/2016 00:05:51	OBJ	<p>Dear planning officer</p> <p>I was disappointed to hear that my local healthcare practice maybe disappearing for my 12 monthly checks.</p> <p>After looking at the plans submitted it looks like the the practice provisions are an after thought . We no regards for the patient like that work around the corner that use this practice .</p> <p>I find the access easy from ground level and also attend to see the physiotherapist their.</p> <p>Furthermore the calming nature and attention to detail the practice offers for a patient like me that Farringdon it hard to go to a clinic . Being put in a claustrophobic environment and probably not a viable environment is not protecting community healthcare and furthermore is detrimental to the community that live and work here.</p> <p>I hope that the council will help preserve sites that are actually helping the health of local workers.</p>

2016/6194/P	Dr Gazelle Hassas	Apartment five hatton house 81 hartfeild road sw19 3es	28/12/2016 13:54:37	OBJ	<p>Dear Sirs</p> <p>It is important as a dentist to have natural lighting in the surgery. The main reason for this is shade taking and colour matching for fillings. This requires natural lighting to get the shade exactly right.</p> <p>Also as a Dentist, working in a small surgery for eight hours a day, natural light affects what and how well I am able to see, and indirectly, it effects my mood. If the natural light was to be replaced with florescent lighting required for brightness, the bright lighting makes it more difficult for my eyes to focus and gives me eye strain because of the intense nature of the job resulting in headaches.</p> <p>I am sure you will appreciate that working in an area of 8 hours with no natural light is impossible and no one should have to.</p> <p>I hope you will consider that dentistry is a very precise, intense profession and the very nature of the job is dependent on good natural lighting and understand that working in a limited space is not productive . My surgery is located on ground level and patients that have disabilities are able to have a straight entry point from street level.</p> <p>As for these group of patients it is difficult to get into the chair and thought of access has to be given to this set of patients.</p> <p>Yours Sincerely</p> <p>Gazelle Hassas</p>

2016/6194/P	michaela sedivkova	8 Borddmall Road London w93ee	28/12/2016 13:29:39	OBJ	<p>23.12.2016</p> <p>Mr J McClue</p> <p>This letter is regarding the planning permission at 49-51 Farringdon Road, where I have been working for Malmin Dental for over five years.</p> <p>I value the present working conditions at my workplace, especially the natural light that we manage to enjoy throughout our working days, and especially in the winter season when the daylight is so limited. I feel that if I wouldn't have it at my workplace where I spend over nine hours sometimes, it would have a great impact on my wellbeing and efficiency.</p> <p>As I travel a long distance to reach the practice, It would mean arriving when it's still partly dark and then leaving work in the dark again. I feel I would not get the natural source of energy and overall a relaxed working environment.</p> <p>I must also draw your attention to the fact that some aspects of dentistry do rely on using natural light for patient's treatments, something that cannot be achieved which any source of artificial light (i.e taking of shades).</p> <p>I am unable to work in the basement and as you can imagine not many people are without any natural light.</p> <p>I hope you will give serious consideration to my concerns.</p> <p>Kind regards,</p> <p>Michaela Sedivkova</p>

2016/6194/P	David Lock	Flat 12 Gallery Lofts 69 Hopton Street London SE1 9LF	29/12/2016 21:43:28	COMMNT	<p>I am writing as I am a customer of Malmin Dental Practice of 49-51 Farringdon Road.</p> <p>I am a wheelchair user and I find Malmin Dental to be very sympathetic to my needs. The dental Practice has level access from the street, and it is completely step free inside.</p> <p>I find this very helpful. All the dental rooms are very accommodating for wheelchair users like myself.</p> <p>There are also parking spaces directly outside where blue badge holders can park until 4 o'clock. This is very important too. Please consider this and allow Malmin to stay on the ground floor.</p> <p>Kind regards,</p> <p>David</p>
