Dear Sir,

Application 2016/6856/T: 6 Heath Drive

Heath Drive lies directly above the underground Cannon Stream and is sited in an area of high flood-risk. The risk of flooding is compounded by the large number of hardstandings, which have replaced front gardens, and the remaining trees here are important for absorbing water run-off.

The ash tree in question is an important feature of the street scene, and its loss would be highly detrimental to the Conservation Area.

We note that no causal relationship has been established between the ash tree's roots and the small area of interior cracking to the property. We request that the TPO is extended to include all remaining trees at 6 Heath Drive and that consent is not granted for this important ash to be felled.

Yours faithfully,

Secretary
