Dear Michael

I would like to object to the above application at 1 Centric Close, Camden.

I reside in the basement flat at 25 Oval Road and the property already suffers from a lack of light, particularly in winter. The approval of this development would exacerbate this further and detract from our quality of life at this property.

Furthermore I am aware that our neighbour's property at 27 Oval Road houses a significant collection of historical artefacts which are sensitive to damp (exacerbated by a lack of light) and as well as the property generally being affected by these proposals, this historical collection would also be at risk.

Finally, I would like to register my concern and dismay at the lack of consultation for this proposal. I did not receive a letter about this and was only aware of this when it was pointed out by a neighbour. This is not true consultation and does not allow all stakeholders to have a say in their area.

Please register my objection but keep my name and email address anonymous as part of this application.

Best wishes

Laura Wells
