**Subject:** OBJECTION TO GENERATOR VODAPHONE ANTENNA

To all concerned,

Please record my strenuous objection to the proposed mast.

I live in the block opposite (Knolly's House) on the fifth floor and would be exposed to the maximum dose of radiation emitted by such an antenna.

I already object to the very presence of the Generator in the area, as it has caused nothing but unpleasantness and disturbance in the forms of, noise, litter and general nuisance since it opened and as the money-guzzling yet careless behemoth it is, this proposal is yet another symptom of the company's greed and relentless thirst for profit and total unconcern for its impact upon the local community and its residents.

Please, please for the safety and well-being of the local residents, do all you can to prevent this further blight upon our area and incursion upon our health and well-being and longer-term, I would ask that collectively, you assist us in doing all you can to insist the Generator move out of the area and relocates elsewhere, where it might have a less toxic effect on the neighbourhood.

Yours faithfully,

Stephanie Gerra
