Subject: RE: 1213 Greenwood CC: Acoustic Condition query 2016.06.29

Hello Ray,

I am more than happy for condition 12 to be revised adding the reference levels suggested in the Hann Tucker letter reference HT: 22766/RPB/mju. If you require any further clarification, please do not hesitate to contact me.

Regards

Edward Davis

Hi Edward,

Following our earlier conversation, please find below the email I referred to from Philip regarding Condition 12. We would be grateful for your acceptance/advice when you are back in the office.

Please call if you have any queries.

Kind Regards

Ray Sims

Hi Edward

Thank you very much for your prompt response, Hann Tucker have responded as follows:

“Since the project is clearly complex with multiple different rooms requiring different internal ambient noise levels, we believe it would be inappropriate to blanket all of these rooms with one criteria.

We would, therefore, propose that planning Condition 12 could reference our letter, reference HT: 22766/RPB/mju, and the levels within said letter be targeted.

We would be happy to discuss the matter further if you wish”

I have copied in Richard Booth from Hann Tucker should you wish to discuss further as suggested.

Kind Regards

Philip Harvey

Hello Philip,

Thank you for your query. I have read the Hann Tucker report which makes valid point in terms of alternative standards. May I suggest that you consult with Hann Tucker and propose an alternative condition based on their findings and I will be more than happy to incorporate that into a response to meeting Condition 12 of the application.

Regards

Subject: 1213 Greenwood CC: Acoustic Condition query 2016.06.29

Dear Edward

RE: 2015/3151/P (2013/5947/P) Condition 12.

I've been given your contact details by Zenab as the best person to contact in regard to acoustic matters on the above project. We are now progressing the detailed design of the Centre (not the residential building) and have an acoustic consultant on board, from whom we attach a letter with regard to the requirements of this condition. The letter is self-explanatory I think, but in short it provides a justification for alternate acoustic performance standards to be considered based on further detailed analysis of the individual room types. As such we also include our acoustic layouts indicating the position of rooms referred to from page 5 of the letter. Please note there is also a basement to the project and access to the roof which is not included within the attached information.

As such we would appreciate your opinion on the attached and if in agreement advice on how we should progress with clearing the condition.

Please let me know if you have any queries

Kind Regards

Philip Harvey
