Informative(s):

- 1 Reasons for granting permission.

The proposal relates to the erection of a mansard roof to match those existing along the terrace. The proposal includes the addition of a roof terrace to the front. Since the original submission, the proposal has been amended to incorporate a side mansard into the design and the position of the mansard at the rear has been situated behind the existing butterfly parapet to ensure that this architectural feature would remain.

The wider pattern of development along the terrace has overtime incorporated roof extensions. The proposed extension would align with the neighbouring roof which has been extended and has been built to match the height of the existing mansard extensions. Given the existing presence of mansard extensions, the neighbouring context and scale of the projection of the extension, the proposal is considered to be acceptable. The incorporation of the side mansard and retention of the butterfly parapet would further reduce the bulk of the proposal. The size, design and materials of this extension are considered to be acceptable. Given this, the proposal will not adversely impact on the appearance of the host building or the wider conservation area and would be subordinate to the host building.

It is viewed that the size, location and height of the extension will not adversely

harm the amenity of the adjoining conservation or the amenity of residential occupiers in terms of loss of daylight, sunlight, outlook or privacy.

With regards to the proposed roof terrace at the front elevation, the terrace is consistent with similar schemes along Egbert Street and would not result in any additional amenity concerns for adjoining occupiers. The roof terrace is therefore considered to be acceptable.

The proposal is considered to preserve the character and appearance of the conservation area. Special attention has been paid to the desirability of preserving or enhancing the character or appearance of the Conservation Area, under s.72 of the Planning (Listed Buildings and Conservation Areas) Act 1990 as amended by the Enterprise and Regulatory Reform Act 2013.

The CAAC raised objections to the original scheme, however, given the amendments undertaken have subsequently withdrawn their objection. The application site's planning history and relevant decisions were taken into account when coming to this decision.

The proposed development is in general accordance with Policies CS5 and CS14 of the London Borough of Camden Local Development Framework Core Strategy, and Policies DP24, DP25 and DP26 of the London Borough of Camden Local Development Framework Development Policies. The proposed development also accords with the London Plan 2016; and the provisions of the National Planning Policy Framework 2012.
