

Our Ref: SH/QT/1216/15
08 December 2016

Mrs Clarke
34 Queens Grove
London NW8 6HN

Dear Mrs Clarke,

Please find below proposed tree works at the above address.

<u>SPECIES</u>	<u>WORK PROPOSED</u>
<u>Front left</u> T2 Purple leaf Plum x (<i>Prunus cerasifera</i>)	Mature tree. This tree is diseased. There is a Ganoderma applanatum fungal bracket at the base of the tree to the Southeast. This fungus is a root and butt rotter that causes delignification. The end result is mechanical failure of the butt and/or trunk. Given the location of the tree and the potential targets, the suggested works are: To fell to ground level by sectional takedown.
<u>Front right</u> T3 Horse Chestnut x 1 (<i>Aesculus hippocastanum</i>)	Large, mature, previously reduced tree. To maintain the tree, the suggested works are: To reduce back to the previous points of reduction, retain shortened furnishing growth for crown continuity, clean out crown, remove deadwood.
<u>Rear right</u> T4 Himalayan Birch x (<i>Betula utilis</i>)	Mature, previously reduced tree. To maintain the tree, the suggested works are: To reduce back to the previous points of reduction, retain shortened furnishing

growth for crown continuity, remove
deadwood.

Please quote our reference number on all your correspondence.

Yours sincerely,

Steve Hawkins, RFS Arb.
