

SHOPFRONT SIGNAGE @ 1:50

PROPOSED SIGNAGE

New fixed fascia sign to be formed in flat 3mm laser cut stainless steel letters and fixed to existing fascia with concealed fixing bolts with 22mm stainless steel spacers, reversible. The sign is to be polyester powder-coated black to match the tone of the painted fascia so as to be visually discrete.

- ① The sign is to be toplit with two discrete black painted LED adjustable spotlights as described in the manufacturers literature which accompanies this application. These are fixed through the cornice with single cable way to match existing, all reversible. The illuminance level will be no greater than 600 cd/m. This will give limited light output onto the face of the sign so that it is legible against the matching background of the fascia.

The proposed dimensions are as indicated.
