Dear Ms Craig

Re: Application number: 2017/0075/P
Variation of condition 2 (approved plans) of planning permission 2015/6775/P dated 03/06/16 (for installation of CCTV system) namely to alter the location of the central pole 2m south.

I am looking at this application and would like to comment on it.
I have noticed the following error on you web page. You state:

Application Registered 13-01-2017
Comments Until 05-01-2017

I don't think you can set a deadline for comments which is before the date of registration.

I would also like to point out that the applicant's plans are incomplete and therefore fail to show the proposal clearly. The outlines of 10 flats (nos. 5-14) on the same ground level as the proposed 6 m high pole are missing from the plan. I am concerned that this would be misleading for a planning officer unfamiliar with the site. Furthermore, the current proposal's 'Approved Site Plan' does not match the previous proposal's 'Landscape Layout proposed'.

Can you please confirm without delay that you will reset the time allowed for comments.

A reasonable time would be 30 days from the applicant submitting complete drawings showing exactly what is proposed, assuming you will post them on your website promptly and notify all local residents.

Yours sincerely

Anthony Auerbach
