2016/6699/P	Gabriel Balint-Kurti	40 Eton Court Eton Avenue London NW3 3HJ	31/01/2017 12:41:25	OBJEMPER	I strongly oppose this application. The applicant must receive the agreement/approval of London Underground to their construction plans before any demolition begins. If the present building is torn down without this approval then we will be left with a derelict site in the heart of our community. This dereliction may last for endless years and be a continuing threat to the environment. The current building is an asset to the locality, while the planned construction will totally ruin our neighbourhood. It threatens the only tiny green space within walking distance of my flat. Approval should never have been given to this atrocious scheme.
