2016/6642/P	John Green	4 Jeffrey's Street London NW1 9PR	02/02/2017 23:08:21	OBJ	<p>On behalf of the Jeffrey's Street Association, I object to the proposed development on the grounds that it neither enhances nor preserves the character of the Jeffrey's Street Conservation Area.</p> <p>At present there is an intact two storey parapet line without roof extensions in Prowse Place and Jeffrey's Place. The proposed additional storey to this building would destroy the character of the existing two storey houses none of which have roof extensions.</p> <p>If a roof extension is approved for this building then there will be no reason to refuse applications for similar roof extensions be they of a mansard or box style as in this application to the remaining two storey properties in Jeffreys Place and Prowse Place and a significant irreversible change in the character of this Conservation Area will have taken place.</p>
