2016/6954/P	john burrell	15 Aberdare Gardens London NW6 3AJ NW6 3AJ	08/02/2017 08:58:31	OBJNOT	<p>The area is a well established Conservation area. Aberdare Gardens alone retains the integrity of the original design construction with no additional upward development. Some years ago an application which had been irregularly approved was revoked after application by the council to the Secretary of State.</p> <p>This proposal would undermine the status of the road as retaining its original design concept and would be used going forward as a basis to justify larger development on other properties not just of similar nature but of enhanced size and including roofing and thereby destroy the uniquely preserved status of the road.</p> <p>Such additional useable space as proposed with its height advantage would cause a loss of amenity in inevitable loss of light and the intrusion onto the privacy of other properties.</p>
