2016/6697/P	Katerina Gould	188 Goldhurst Terrace	12/02/2017 17:17:25	OBJNOT	<p>We object to the proposed planning application on the following grounds:</p> <ol style="list-style-type: none"> 1. The front excavation will adversely affect the look of the property in what is a conservation area. This would be an overbearing feature and would ruin the design and "line" of the properties which are all similar 2. The area has already been overbuilt and this is an excessive development 3. There are already a large number of basements in place in the area which may have had an adverse impact on the underlying soil stability (i.e. risk of subsidence) which this development will exacerbate 4. Working from home, in an office which faces the street, we are concerned about the intense noise disruption during the construction period which is likely to be lengthy given the size of the development
2016/6697/P	Emma Meaden	Flat 1 192 Goldhurst Terrace NW6 3HN	11/02/2017 11:19:12	OBJ	<p>I object to the proposed plans. I suffer from MS and am housebound most of the time. The noise and disruption over a long period of time is going to affect my health I need sleep and no stress. The entire neighbourhood will be disrupted with parking, noise and the possibility of structural damage to the next door buildings.</p>
