Registration No. 2897134

The entrance door set is a French door style with the left hand side master leaf opening inwards when viewed externally.

The master leaf has warped significantly so that it is flush at the door head and from the centre bends inwards from 10mm to 25mm at the bottom rail.

This warping has meant that the night latch keep has had to be packed out in order to operate correctly which potentially could mean that the door set is not secure.

TSWW report Dalton

# Recommendation

- Due to the extent of the warping it will not be possible to adjust the doors in order to straighten up the door rail and make the doors align correctly.
- Therefore replacement doors to the existing frame is recommended.
- The new doors would be copied including the roundels, the bolection moulding and raised and fielded panels as well as fitting of new satin chrome ironmongery.
