Reason: For the avoidance of doubt and in the interest of proper planning.

Informatives:

- 1 Reasons for granting permission.

The proposed replacement of uPVC to timber framed window is considered acceptable following revisions to the design of the window. The existing opening would be increased by 0.2m which is a minor alteration and would not cause significant harm to the host building or conservation area. Although there is mismatch design of windows on the rear elevation of the host building, the design of the replacement window would follow the established pattern of the rear elevation. Therefore the proposal is considered acceptable in terms of design, size and material, and would not be harmful to the character and appearance of the host building or the Primrose Hill Conservation Area.

Special attention has been paid to the desirability of preserving or enhancing the character or appearance of the conservation area, under s.72 of the Planning (Listed Buildings and Conservation Areas) Act 1990 as amended by the Enterprise and Regulatory Reform Act 2013.

The replacement window would have no impact on the amenity of adjoining properties as the proposal would replace existing window and no additional window openings are proposed.

The Primrose Hill CAAC supports the proposal following revision to the design of the proposal. The site's planning history was taken into account when coming to this decision.

As such, the proposed development is in general accordance with policies CS5 and CS14 of the London Borough of Camden Local Development Framework Core Strategy and policies DP24, DP25 and DP26 of the London Borough of Camden Local Development Framework Policies. The proposed development also accords with The London Plan 2016 and the National Planning Policy Framework.
