2017/0733/P	Rod Gray	1 Elgin Road London N22 7UE	14/02/2017 14:24:35	SUPC	<p>I comment on behalf of the Inland Waterways Association (IWA).</p> <p>We welcome the commitment to analysing the effect of changes in wind conditions due to the development, particularly tall buildings, on boats navigating the Regents Canal and will expect mitigating measures to be identified in the detailed proposals. We also welcome the commitment to evaluating the effect of the development on daylight and sunlight levels specifically on the adjacent canal.</p> <p>In relation to the removal of construction waste and spoil from the site, we recommend that use of the canal for this purpose should be properly evaluated.</p> <p>Regards, Rod Gray Planning Officer, NE London branch Inland Waterways Association.</p>
