Published November 2010.

Camden's Local Development Framework. Core Strategy 2010.

CS5. Managing the impact of growth and development

- 5.1 The overall approach of the Core Strategy, as set out in policy CS1, is to manage Camden's growth to make sure that its opportunities and benefits are delivered and sustainable development is achieved, while continuing to conserve and enhance the features that make Camden such an attractive place to live, work and visit. This flows from the Camden Community Strategy theme of a sustainable Camden that adapts to a growing population. Policy CS5 provides more information on our approach to managing the impact of growth in the borough.

CS POLICY

CS5 – Managing the impact of growth and development

The Council will manage the impact of growth and development in Camden. We will ensure that development meets the full range of objectives of the Core Strategy and other Local Development Framework documents, with particular consideration given to:

- a) providing uses that meet the needs of Camden's population and contribute to the borough's London-wide role;
- b) providing the infrastructure and facilities needed to support Camden's population and those who work in and visit the borough;
- c) providing sustainable buildings and spaces of the highest quality; and
- d) protecting and enhancing our environment and heritage and the amenity and quality of life of local communities.

The Council will protect the amenity of Camden's residents and those working in and visiting the borough by:

- e) making sure that the impact of developments on their occupiers and neighbours is fully considered;
- f) seeking to ensure development contributes towards strong and successful communities by balancing the needs of development with the needs and characteristics of local areas and communities; and
- f) requiring mitigation measures where necessary.

Making sure development achieves the objectives of the Core Strategy

- 5.2 Central to managing Camden's future growth is the need to consider not just the scale and nature of that growth, but how it is provided and the effect on those who live in the area and the borough as a whole. All development in Camden, large or small, whether located in growth areas, highly accessible locations or in other parts of the borough, should take place in accordance with all relevant policies in the Core Strategy and the other documents that form part of Camden's Local Development Framework (see paragraph 4 in the Introduction) to ensure that the Council's vision for the borough is achieved. The Council will seek to ensure that the borough's growth brings benefits and opportunities to all.
- 5.3 The second section of this Core Strategy, *Meeting Camden's needs – Providing homes, jobs and facilities*, sets out our approach to providing the land uses, infrastructure and facilities that are needed to support Camden's communities, workers and visitors. This includes places to live, work and shop, community facilities and provision for walking, cycling and public transport. The section also sets out our approach to the unique issues faced in Central London, the home to many of the uses that contribute to London's role as a capital and major international city, as well as long-established residential communities.

- 5.4 One of the key elements of managing Camden’s growth is securing the infrastructure and services needed to support Camden’s growing numbers of residents, workers and visitors. To identify the infrastructure need in the borough in future years we commissioned the Camden Infrastructure Study 2009. This work formed the basis of the schedule in Appendix 1, which set out identified key infrastructure programmes and projects including transport, utilities, emergency services, education, health and other community facilities. It gives information on the nature of each infrastructure scheme, where it will be located, who will lead on its delivery and when it is expected to be provided. As the boundaries of the growth area are relatively tightly drawn, taking in the main development opportunities, the infrastructure to support a particular growth area may be provided outside its boundary. Please see section 19 – *Delivering and monitoring the Core Strategy* for more detail on our approach to infrastructure provision. In addition, the individual sections in the Core Strategy also contain details of infrastructure requirements and provision that are relevant to that section (for example, policy CS15 on open space and policy CS11 on transport.)
- 5.5 The third section of the Core Strategy, *A sustainable and attractive Camden – Tackling climate change and improving and protecting Camden’s environment and quality of life*, focuses on making sure that growth is sustainable and properly takes into account the character of Camden and the aspects of the borough that make it such an attractive place to live, work and visit. It sets out how we intend to make Camden a low carbon, low waste borough; deal with climate change; and protect, and where possible enhance, our built environment, heritage and open spaces. It also sets out our approach to improving the safety and health of the community.
- 5.6 Our Camden Development Policies Local Development Framework document will be one of the main mechanisms by which we will seek to deliver to vision and objectives in the Core Strategy. It sets out planning policies that provide more detail of our approach to many of the matters covered in this Core Strategy. We will use Camden Development Policies alongside the Core Strategy when we determine applications for planning permission.

Protecting amenity

- 5.7 Camden’s high level of amenity – the features of a place that contribute to its attractiveness and comfort – is a major factor in the quality of life of the borough’s residents, workers and visitors and fundamental to Camden’s attractiveness and success. However, Camden’s inner London location, the close proximity of various uses and the presence of major roads and railways can mean that privacy, noise and light can be particular issues in the borough.
- 5.8 Protecting amenity is, therefore, a key part of successfully managing growth in Camden. We will expect development to avoid harmful effects on the amenity of existing and future occupiers and nearby properties or, where this is not possible, to take appropriate measures to minimise potential negative impacts. More detail and guidance on our approach to amenity is contained in Camden Development Policies policy DP26 – and our Camden Planning Guidance supplementary document. Other policies in Camden Development Policies also contribute to protecting amenity in the borough by setting out our detailed approach to specific issues, such as the impact of food, drink and entertainment uses (policy DP12), noise and vibration (policy DP28) and air quality (policy DP32)

Promoting successful communities

- 5.9 A key element to our overall strategy of managing Camden’s future growth is to ensure that the opportunities and benefits of this growth are delivered in a way that meets the needs of Camden’s residents and promotes strong and successful communities. In assessing development proposals, the Council will take into account the needs and benefits of the development alongside the individual characteristics and needs of the local area and community, and will seek to strike a balance between them. Where relevant, we will take into account the cumulative impacts of developments, or particular types of development, on local areas and communities.

CS7. Promoting Camden's centres and shops

- 7.1 Camden benefits from a wide variety of town and neighbourhood centres with different characters and roles, from Camden Town and its famous markets to upmarket Hampstead, from the furniture and electronics shops of Tottenham Court Road to the ethnic restaurants on Drummond Street. Our centres are of great importance to the life of the borough and those that live in, work in and visit it. As well as providing shopping and services and places of work and leisure, they are a focus of activity and community life and provide character and identity to local areas and the borough as a whole.
- 7.2 This section provides a planning framework to ensure that the vibrancy and vitality of Camden's centres is protected and enhanced. It sets out how the Council will integrate land use measures with environmental improvements, infrastructure delivery, partnership working and investment to protect and enhance the character and function of Camden's centres.
- 7.3 Other policies in this Core Strategy are also relevant to the Council's approach to Camden's centres. Policy CS1 identifies most of the borough's town centres as highly accessible areas that are considered to be particularly suitable locations for uses that are likely to lead to a significant increase in travel demand. It also promotes higher densities in these locations and encourages mixed use development in the most accessible centres in the borough, helping to promote mixed, vibrant centres. Policy CS3 provides more detail on these areas. Policy CS11 supports the provision of the transport infrastructure needed to support the continued viability of our centres.
- 7.4 Significant new development for a range of commercial uses is already in the pipeline in the King's Cross/St Pancras area, with a total of 20,000 square metres of additional A1 retail floorspace committed or provided through the development of the King's Cross growth area (outline planning permission granted for approximately 15,500 square metres) and the redevelopment of St Pancras Station (approximately 4,500 square metres). The Camden Retail Study 2008 indicates a need for around 27-31,000 square metres of new retail floorspace in the borough by 2026, in addition to that to be provided at King's Cross and St Pancras.

CS7 – Promoting Camden’s centres and shops

Distribution of retail across Camden

The Council will promote the following distribution of retail growth across the borough:

- a) in the range of 20,000 square metres net retail floorspace at King’s Cross/St Pancras;
- b) in the range of 20-30,000 square metres additional retail at Euston and Camden Town, with the majority expected to take place at Euston;
- c) additional provision as part of redevelopment schemes in the growth areas of Tottenham Court Road, Holborn and West Hampstead Interchange; and
- d) some provision in other town centres and Central London Frontages where opportunities emerge.

We will apply a sequential approach to retail and other town centre uses outside of these areas to support the following network of centres:

Town centres: Camden Town; Kilburn High Road; Finchley Road/Swiss Cottage; Kentish Town; West Hampstead; and Hampstead;

Central London Frontages: Tottenham Court Road/ Charing Cross Road/ New Oxford Street; High Holborn/ Kingsway and the main commercial area around King’s Cross;

Neighbourhood centres: located across the borough;

We will also support:

- limited provision of small shops outside centres to meet local needs; and
- appropriate retail provision in Camden’s **Specialist Shopping Areas:** Covent Garden; Hatton Garden, Museum Street, Drummond Street and Denmark Street.

Protecting and enhancing Camden’s centres

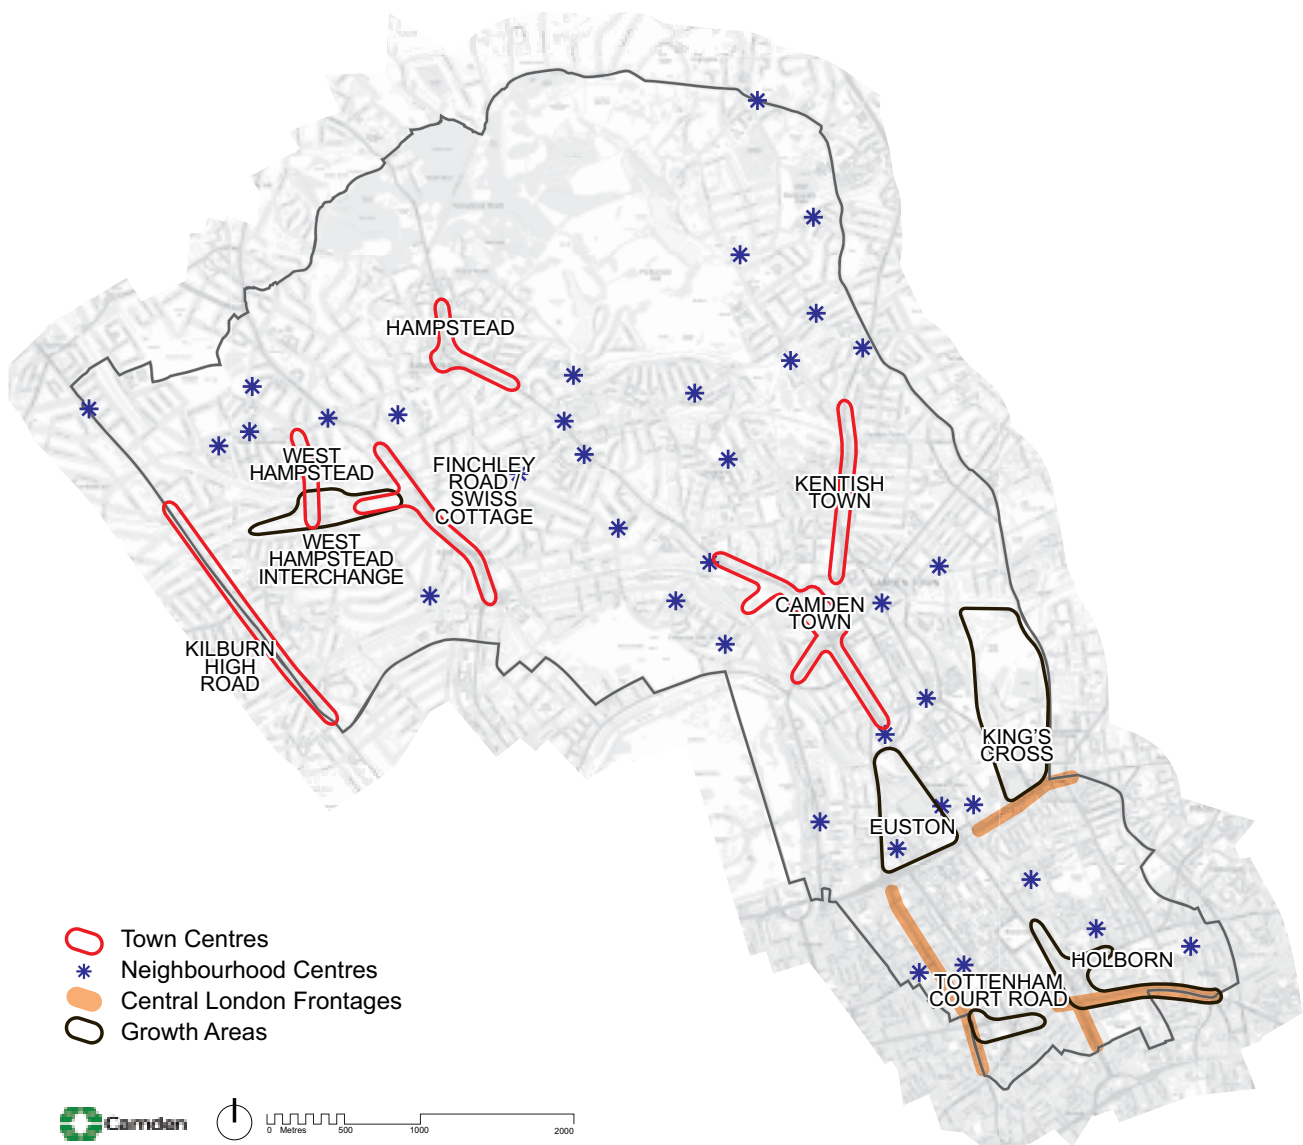

The Council will promote successful and vibrant centres throughout the borough to serve the needs of residents, workers and visitors by:

- e) seeking to protect and enhance the role and unique character of each of Camden’s centres, ensuring that new development is of an appropriate scale and character for the centre in which it is located;
- f) providing for, and maintaining, a range of shops, services, food, drink and entertainment and other suitable uses to provide variety, vibrancy and choice;
- g) protecting and promoting small and independent shops, and resisting the loss of shops where this would cause harm to the character and function of a centre;
- h) making sure that food, drink and entertainment uses do not have a harmful impact on residents and the local area, and focusing such uses in Camden’s Central London Frontages, Town Centres and the King’s Cross Opportunity Area;
- i) supporting and protecting Camden’s local shops, markets and areas of specialist shopping; and
- j) pursuing the individual planning objectives for each centre, as set out below, including through the delivery of environmental, design, transport and public safety measures.

Distribution of retail growth

- 7.5 We will focus new shopping (and related uses) in Camden’s designated growth areas and existing centres, having regard to the level of capacity available in these locations. The borough’s growth areas and town centres are shown on maps 1 – Key Diagram and 2 – Town Centres.
- 7.6 The growth area of King’s Cross will provide the major focus for new shop provision in Camden. The King’s Cross Central redevelopment will include shops, services and facilities of a scale similar to a town centre to meet the needs of the large numbers of people who will be living in, working in, or visiting the area. Planning permission has been granted for 45,000 sq m of retail, food and drink floorspace (in A use classes). This will be spread throughout the site and will open in phases. It is currently expected that 65% of the floorspace will be operating by 2016. In addition, substantial new retail has already been approved and built at nearby St Pancras Station (see paragraph 7.4 of this section).

Map 2: Town Centres

This map is based on Ordnance Survey Material with the permission of Ordnance Survey on behalf of the Controller of Her Majesty's Stationery Office ©. Unauthorised reproduction infringes Crown copyright and may lead to prosecution or civil proceedings. Licence number LA100019726, year 2010.

- 7.7 The majority of retail growth above and beyond that at King's Cross and St Pancras will be delivered at Camden Town and Euston, which contain sites suitable for significant retail development. We consider that these locations have the capacity to accommodate in the order of 20-30,000 square metres of additional retail in total. However, the precise quantum and type of retail to be provided on these sites will be subject to detailed site specific assessments, and an assessment of any impacts on other centres. At Camden Town, Hawley Wharf provides an opportunity to deliver new retail floorspace, along with other mixed uses. There is also the opportunity to deliver a significant amount of additional retail floorspace as part of the redevelopment of Euston Station. This is expected to meet demand from people travelling through the station, as well as serving a local catchment, but should not cause harm to the vitality or viability of other nearby centres, including Drummond Street.
- 7.8 It is anticipated that much of the remaining retail requirement will be met through redevelopment in the growth areas of Tottenham Court Road, West Hampstead and Holborn. At Tottenham Court Road and Holborn the redevelopment of existing buildings will enable the provision of new retail, in particular at ground floor level. At West Hampstead, redevelopment should provide additional retail, which will be focused along West End Lane. Some new retail provision is also expected to be achieved in Camden's other town centres and Central London Frontages. Although the Camden Retail Study 2008 found that these other centres have limited opportunities for the provision of additional retail, redevelopment of existing buildings is likely to provide some increases in shop floorspace.
- 7.9 The Camden Site Allocations Local Development Framework document will identify sites that are expected to provide retail floorspace as part of redevelopment schemes.
- 7.10 In line with government Planning Policy Statement (PPS) 4, the Council will take a sequential approach when assessing proposals for new town centre uses (as defined in PPS4), ensuring that such development takes place in appropriate locations, having regard to the distribution of future retail growth established in Policy CS7 and the hierarchy of centres. Further guidance on the sequential approach is set out in Planning Policy Statement (PPS) 4 – *Planning for Sustainable Economic Growth*.

- 7.11 Policy CS7 establishes the hierarchy of centres within the borough. The role and function of Camden's centres varies greatly, reflecting the varied nature of the borough itself:
- Camden's Central London Frontages serve a similar function to town centres or have a London-wide or even national retail role, for example Tottenham Court Road;
 - Camden's town centres vary in terms of their size and role, the kind of shops and services they provide and in the distance people travel to them. While with some centres predominantly serve local needs (for example at Kilburn and Kentish Town), others also attract people from a much wider catchment (for example, Hampstead). Camden Town is a major tourist destination, including for international visitors. In addition to Camden's six town centres, Cricklewood neighbourhood centre forms part of a larger District Centre, with the majority of the centre located to the north of Camden within the boroughs of Barnet and Brent;
 - Camden's 36 neighbourhood centres provide for the day-to-day needs of people living, working and staying nearby (see Map 2 – Town Centres). Due to their relative size, Camden's neighbourhood centres are considered to be equivalent to local centres, as defined in PPS4 (Annex B);
 - Camden's individual, and groups of, specialist shops (for example, Museum Street and Covent Garden) contribute greatly to the variety and character of the borough. Whilst our Specialist Shopping Areas do not form part of our network of centres for the purposes of the sequential approach to new town centre development, we will support the provision of new retail in these centres;
 - A number of smaller shopping parades and individual shops also meet local needs for shopping, services and facilities.

Protecting and enhancing Camden's centres

Protecting and enhancing the character and role of Camden's centres

- 7.12 The development of new shops or other town centre uses, particularly when they are large in scale, can have an impact on other centres. In line with government guidance in Planning Policy Statement (PPS) 4 *Planning for Sustainable Economic Growth*, the Council will seek to protect the vibrancy and vitality of its centres by assessing the impact of proposed town centre uses (as defined in paragraph 7 of PPS4) on Camden's centres. The Council will require an impact assessment for large retail development proposals that are not in accordance with the approach in this Core Strategy and
- would be in an edge of centre or out of centre location, or
 - would be in an existing centre and have the potential to have a harmful impact on other centres.
- 7.13 Further guidance on assessing impact and information on relevant matters to be addressed in retail impact assessments is set out in PPS 4 and the accompanying *Practice guidance on need, impact and the sequential approach*.
- 7.14 The Council will ensure that development in its centres is appropriate to the character, size and role of the centre in which it is located (see below), and does not cause harm to neighbours, the local area or other centres. Shop and service uses (in use classes A1 and A2) and markets are considered suitable for all levels of centre.
- 7.15 The way centres look is an important factor in their character and the way they are perceived – Policy CS14 and policies DP24 and DP25 in Camden Development Policies set out our approach to seeking high design standards and preserving and enhancing Camden's heritage. A number of our centres lie wholly or partly within conservation areas (for example, Camden Town, Hampstead, West Hampstead and many neighbourhood centres), recognising their architectural and/or historical importance. Further information on these areas and guidelines on the Council's approach to protecting them and managing change is set out in individual conservation area statements, appraisals and management strategies. The design of shopfronts can contribute greatly to the character of centres and their distinctiveness. Our approach to shopfronts is set out in Camden Development Policies (policy DP30) and the Council's Camden Planning Guidance supplementary planning document.

Ensuring a range of shops and other town centre uses

- 7.16 The success of a centre is strongly influenced by the variety and choice of shops, services and other uses within it. Policy DP12 in Camden Development Policies sets out more detail on our approach to protecting the character, function, vitality and viability of our centres through managing the mix of uses in them and ensuring that development does not cause harm to a centre, to its neighbours or to the local area. Camden has used a range of information sources, including the Camden Retail Study 2008 and comments from local residents and businesses to establish what our approach should be for each centre. The centre specific planning objectives set out below provide objectives for each of Camden’s centres, and address the mix of retail and non-retail uses sought. Tourist uses such as hotels and employment generating uses such as offices can make an important contribution to the economic success of town centres – our approach to these uses is set out in policy CS8 and policies DP13 and DP14 of Camden Development Policies. Community and cultural uses add to the vitality and vibrancy of Camden’s centres by adding to the diversity of uses in an area, and the variety of activities that take place at different times of the day. Camden’s approach to these uses is set out in Core Strategy policy CS10 and Development Policy DP15.
- 7.17 Small and independent shops contribute to the character and diversity of Camden’s centres by adding to the choice and variety of shopping facilities available, and avoiding centres being dominated by national multiple retailers. The contribution of small and independent shops to the character and attractiveness of many of Camden’s centres is highlighted in the Camden Retail Study. The Council will seek to promote the provision of small units where appropriate and independent shops where possible. We will also seek to protect shops, including those on small shopping parades, where their loss would cause harm to a centre or local area. Our detailed approach to protecting shops and promoting small and independent businesses is set out in Camden Development Policies (policy DP10).

Minimising the impact of food, drink and entertainment uses

- 7.18 Food, drink and entertainment uses add to the diversity and vibrancy of Camden’s centres and bring activity to them outside normal shopping hours. This includes the borough’s rich culture of live music, dance and theatre, as well as restaurants and bars. These uses are important to the borough socially, culturally and economically, and contribute to Camden’s image as a vibrant and attractive place. However, local residents can be affected by disturbance and anti-social behaviour associated with some of the people visiting such premises, particularly premises serving alcohol. The dense, mixed-use nature of much of the borough, means that it is particularly important that town centre uses such as food, drink and entertainment uses are managed so that they do not cause harm to surrounding communities and the local environment. The Council wants to see the borough continue to be a successful location for food, drink and entertainment uses while making sure that the quality of life of local people, workers and visitors is not harmed. Policy DP12 in Camden Development Policies sets out more detailed information regarding the Council’s approach to managing the impact of food, drink, entertainment and other town centre uses.

- 7.19 Food, drink and entertainment uses, such as restaurants, pubs and bars, music venues, cafés and hot food take-aways, are most appropriately located in commercial areas to minimise their impact on the amenity of local residents. Town centres and Central London Frontages are considered the most suitable locations for such uses. Some food, drink and entertainment premises will also be provided in Camden's growth areas, in particular at King's Cross. The Council wishes to see a range of such uses for all age groups within its centres, not just those that primarily involve drinking.
- 7.20 The Council recognises that individual small-scale food and drink uses outside larger centres can be important local facilities, reducing the need to travel and providing community meeting places. It therefore considers that neighbourhood centres are suitable for small-scale food and drink uses (generally less than 100 square metres) which serve a local catchment, provided they do not cause harm to the surrounding area or residents.
- 7.21 The Council's responsibilities as a licensing authority, separate to its planning functions, gives it additional influence on premises that sell alcohol and/or provide regulated entertainment or late-night refreshment. The Council's approach to licensing is set out in Camden's Statement of Licensing Policy. See also Policy CS17 – *Making Camden a safer place*.
- 7.22 The Council has also produced a series of area planning documents (for Camden Town, Central London, West Hampstead and Finchley Road/Swiss Cottage) which give more detailed guidance on how the Council will treat planning applications for shops, food, drink and entertainment uses in particular centres, taking into account their specific circumstances.

Camden's markets and areas of specialist shopping

- 7.23 Camden is well served by markets, ranging from street markets such as Inverness Street, Chalton Street, Leather Lane and Queens Crescent to the world famous Camden Town markets (e.g. the Stables and Camden Lock markets). Markets add greatly to the variety, interest and attraction of shopping in the borough and are a source of local employment, often providing more flexible and casual work opportunities. Street markets can be an important source of fresh food, often grown more locally than food from supermarkets. They can also help to meet the specialist food needs of ethnic communities; black and minority ethnic groups tend to make significantly more use of local markets than the general population.
- 7.24 It is important that markets are carefully managed to prevent any potential negative impacts such as congestion and litter. The Camden Development Policies document sets out detail on the Council's approach to planning applications involving markets (see policy DP11).
- 7.25 Camden has a number of areas which provide specialist shopping, drawing people from beyond Camden and often from beyond London. These include the area around Museum Street for antiquarian books, prints and coins; Hatton Garden for jewellery; Denmark Street for music; Charing Cross Road for books; Tottenham Court Road for furniture and electronics; Drummond Street for ethnic Asian shops and restaurants; and parts of Covent Garden and Camden Town for fashion. Like markets, these specialist shopping areas help to provide variety and individuality that is in contrast to the more standard range of shops found in many centres.
- 7.26 The Council aims to support and protect these areas, which make a great contribution towards the attractiveness and diversity of the borough. Camden's specialist shopping areas fall within Central London and Camden Town, for which we have produced specific area guidance. These recognise the role of our specialist shopping areas and, although councils have limited powers to protect specific retail uses, use the influence available to support and encourage them; for example, by restricting changes from shops (in use class A1) to other uses to maintain a stock of suitable premises.

Centre-specific planning objectives

- 7.27 Each of Camden's centres has its own character and role. These are described below, alongside the Council's objectives for each centre. The Council will expect development in our centres to reflect the character and role of the centre in which it is located, and meet our stated objectives for that centre.

- 7.28 The Council and its partners undertake a range of work to improve and support our centres. This includes improvements to the street environment and transport provision and measures to improve public safety and prevent crime and anti-social behaviour. Policy CS11 – *Promoting sustainable and efficient travel* and Appendix 1 – *Key infrastructure programmes and projects* (items 39-50, 55 and 56) give details of the delivery of the transport infrastructure improvements and public space enhancements that will benefit and support our town centres and Central London. These improvements will play a crucial role in helping to deliver our centre-specific objectives.
- 7.29 The way that town centres are managed can have an important impact on the success of a centre. The Council is currently in the process of reviewing its Town Centre Management Strategy, and is setting up appropriate management structures in order to pursue continued improvements to its centres. Town centre management will play an important role in taking forward the Council's objectives for each of its centres.

Centre specific planning objectives

Camden Town

Camden Town is a vibrant centre, internationally famous for its unique markets, independent fashion and its music and entertainment venues such as the Roundhouse and Koko. It is also home to many residents and to numerous businesses, small and large, notably media, cultural and creative industries, attracted by the area's unique atmosphere. Camden Town is the borough's biggest centre with the largest range of shops and services, and is designated as a Major Centre in the London Plan. The centre does not have a single character but broadly contains three parts – the commercial heart in the markets and around Camden Town tube station; the southern section which provides more traditional 'high street' shopping and serves a more local role; and Chalk Farm Road to the north with its mixed street frontage of restaurants, bars and specialist shops. A cluster of creative industries in the areas around Camden High Street also adds to the centre's vibrancy. The Camden Retail Study 2008 found that there is demand for the expansion of shop chains into the market area, which could drive up rents and threaten the traders in smaller shop units that provide much of Camden Town's attraction as a shopping destination.

Although Camden Town is a successful centre, it faces challenges in terms of crime and anti-social behaviour. The centre is recognised as a priority for the Council and its partners in Camden's Community Strategy. The challenge is to make Camden Town a successful and safe place with something for local people and visitors of all ages, without losing important aspects of its unique character.

The Council's approach to supporting and promoting the success of Camden Town will include:

- **improving the street environment and pedestrian movement, and reducing negative traffic impacts generated along Camden High Street.** The Council has a programme of works to improve streets and spaces in Camden Town. Camden Town Unlimited have produced *Camden Town First – Streets, Spaces and Places – A Vision for Change* which sets out the business community's aims for improving Camden Town's environment. We will also continue to seek improvements to Regent's Canal, which contributes to the unique character and setting of the centre;
- **making Camden Town feel safer through community safety measures.** We will continue to work with the police and other agencies to reduce the overall crime rate in Camden Town. Camden's Community Safety Partnership Strategy, Camden Safe, sets out specific targets and actions to reduce crime and anti-social behaviour in the area. All development should include appropriate design measures to prevent crime and anti-social behaviour;
- **seeking to protect the special character and attractiveness of Camden Town by pursuing the continued provision of small shop units.** Development schemes in the upper part of Camden High Street/markets area (north of Inverness Street and south of the railway bridge) will be expected to provide small shop units consistent with this part of the centre, which is characterised by small ground floor premises. Larger units in this location would be harmful to the character and diversity of Camden Town, and to the viability of small, independent traders. As a guide, units larger than 100 sq m will not be permitted in this part of the centre. Larger shop units will be supported in the southern part of Camden High Street;
- **supporting and promoting the creative industries sector in Camden Town.** Camden Town has significant opportunities to develop its creative industries, given the large number of existing media, cultural and other creative businesses that are clustered around Camden High Street, and opportunities resulting from the nearby redevelopment and transport improvements at King's Cross. We will seek to enable the growth of this sector by: supporting the provision of new, high quality offices, studios, workshops and other premises, and working in partnership with Camden Town Unlimited, to actively support, promote and attract creative industries to the area;

- **managing the balance of retail and leisure uses.** The Council will continue to ensure that the majority of uses on the southern part of Camden Town (south of the Jamestown Road) are in retail use, whilst allowing for more equal balance between retail and non-retail uses to the north, as set out in our Revised Planning Guidance for Camden Town supplementary document. The Council will welcome uses that add to the centre's choice of facilities and attractions for people of different ages;
- **ensuring that Camden has a well-managed night time economy.** Our planning guidance for Camden Town aims to manage the location and concentration of food, drink and entertainment uses, particularly those which operate late into the evening, so they enhance the area through their contribution to its attraction and vibrancy and do not cause harm to the quality of life of local people or the character of the area and its other uses and activities. The Council's Statement of Licensing Policy contains special policies on the cumulative impact of these uses in Camden Town that restrict new premises licences and new club premises certificates;
- **retaining the special built character of Camden Town by promoting high quality design** of buildings, shopfronts, signage etc that reflects the scale and character of Camden Town centre. The Council has produced Conservation Area Appraisals and Management Strategies for the Camden Town conservation area and the Regent's Canal conservation area, which includes part of Chalk Farm Road. We will take these into account when assessing planning applications for sites in the area. We will seek to retain the distinctive and varied character of the area's heritage assets such as conservation areas and will expect new development to contribute positively to them;
- **promoting and protecting Camden Town's markets.** Camden's markets (Camden Lock, Stables, Canal, Inverness Street and Camden (Buck Street) markets) are a fundamental element in the success and vitality of Camden town centre as well as being an important tourist attraction. Please see above and the Camden Development Policies (policy DP11) for further information on our approach to markets;
- **supporting transport improvements,** in particular improvements to Camden Town Underground Station, and changes to traffic circulation; and
- **identifying development opportunities.** Camden Site Allocations will set out the Council's approach to major development sites in the borough to help deliver the objectives of the Core Strategy and will include sites within Camden Town.

Kilburn High Road

Kilburn High Road straddles the border of Camden and Brent, and is the second largest centre in the borough. It has a large number of small, independent shops and relatively few national chain stores. Although it is designated as a major centre in the London Plan, the centre mostly serves the day-to-day needs of the local population. The Camden Retail Study 2008 found that the economic performance of Kilburn has improved. It also found that the area's evening economy is strong, in particular to the northern end of the High Road, which contains a range of cultural and leisure uses. This is a continuation of Kilburn's historical role as a meeting place and destination for music and other cultural purposes. The southern end of Kilburn High Road has benefited from a number of mixed developments in recent years.

The Council considers that Kilburn will continue its current role serving a predominantly local catchment, while seeking to enable the High Road to take better advantage of its relatively affluent local population, and improving the overall balance and quality of retail available. The Council will continue to work with its partners, in particular the London Borough of Brent and the police, to make the town centre cleaner, safer and more successful.

As there are limited development opportunities on the Camden side of Kilburn High Road, the Council will focus on improving what already exists. A number of ways in which improvements can be achieved go beyond the scope of town planning and relate to management and partnership working; for example, more high quality shop frontages to increase the quality and attractiveness of the centre. The Council work with its partners to investigate providing funding and advice to shop owners to pursue these improvements.

The Council will:

- enhance the street and public spaces through the delivery of further improvement projects in order to make Kilburn High Road a more attractive centre. Where possible, the area's history and heritage should be used to inform the design of schemes to reinforce Kilburn's identity;
- seek to make the High Road a diverse and vibrant centre that takes advantage of its strengths. We will place an emphasis on three 'zones': a shopping core to the centre; a mixed use, cultural zone to the north; and a mixed use zone to the south of Kilburn High Road station. We will focus shopping provision in the core of the centre and allow a wider range of other uses elsewhere – see our Camden Planning Guidance supplementary planning document for more detail on our approach;
- seek the provision of larger units as part of development proposals in the core of the centre, in order to attract a wider range of retailers to the area;
- enhance the character and quality of the 'cultural zone' to the north of the High Road, consolidating and building on the success and attractiveness of existing uses, such as the Tricycle Theatre, music and comedy venues and the range of diverse shops, restaurants, cafes and pubs; and
- improve safety and the perception of safety in Kilburn High Road by requiring development to include appropriate design measures to prevent crime and anti-social behaviour.

Finchley Road/Swiss Cottage

The main shopping area of Finchley Road/Swiss Cottage runs from the O2 Centre, with its concentration of food, drink and entertainment uses, to Swiss Cottage Underground Station, while the refurbished Swiss Cottage Leisure Centre and the listed Swiss Cottage Library provide a focus to the south. The centre runs either side of the busy A41 Finchley Road (managed by Transport for London), which creates a barrier between the two sides of the centre, restricting pedestrian movement and creating a poor environment for visitors. Finchley Road/ Swiss Cottage town centre generally serves the local population, a role which is expected to continue. We have expanded the town centre boundary to include Swiss Cottage Library and Leisure Centre and the Hampstead Theatre (see Map 16), which provide a focus for the south of the centre.

The Council will:

- support the core shopping area and manage the location, concentration and impact of food, drink and entertainment uses in line with the Council's Planning Guidance for Finchley Road/Swiss Cottage in order to protect the character of the centre and the amenity of neighbouring residents;
- work with TfL to improve pedestrian links across Finchley Road, and to assess long term opportunities to reduce traffic impacts along the road, including the possible removal of the one way traffic gyratory;
- promote enhancements to the local environment. We will work with TfL to assess how further pedestrian improvements could be delivered for the centre, including works to improve the public area around Swiss Cottage station; and
- improve 'gateways' into the Centre from key side streets to the west and east of Finchley Road, as proposed in the Camden Local Implementation Plan 2005/06-2010/11.

West Hampstead

West Hampstead centre provides for local people's day-to-day needs for convenience and comparison shopping. It is highly accessible by public transport, with three stations (Thameslink, London Underground and London Overground). West Hampstead Interchange is identified as a growth area in this Core Strategy and the London Plan (see policy CS1 above – Distribution of growth). The extent of the growth area differs from that of the town centre, although the two intersect along West End Lane, between Broadhurst Gardens and the Thameslink station.

The northern end of the centre lies within the West End Green/Parsifal Road Conservation Area and has a high quality environment with a 'village' character. The southern end of the centre around the stations is less attractive and has a poor quality pedestrian environment, although the southernmost part of the centre is in the Swiss Cottage Conservation Area. West Hampstead has relatively high proportions of convenience (food), retail and A3 (restaurants and cafes) uses, many of which are independent.

The Council will seek to ensure that West Hampstead continues to provide a mix of uses to serve the local area, but will avoid further loss of ground floor retail uses. We will:

- work with Transport for London and other partners to improve interchange between rail, underground and bus services and improve the ease of pedestrian movement in the area (see CS11 – *Promoting sustainable and efficient travel*);
- seek to improve the street environment south of West End Green, in particular, to enhance the street scene around the transport interchange area between Broadhurst Gardens and the Thameslink station;
- ensure that development around the interchange provides an appropriate mix of uses and contributes towards improved interchange facilities and a high quality street environment (see CS1 – *Distribution of growth*);
- seek to control the location and concentration of food, drink and entertainment uses in West Hampstead town centre to ensure that they do not cause harm to residents or the character and retail function of the centre by applying the guidance set out in the Council's Supplementary Planning Document for West Hampstead; and
- make sure that development conserves or enhances the special character and appearance of West Hampstead by applying the guidance in the conservation area statements for the area.

Kentish Town

Kentish Town centre provides shopping and service uses for the local area. The Camden Retail Study 2008 found that Kentish Town has a good range of shops and services for a centre of its size, with many independent traders, and a significant amount of food and drink uses.

Although the centre has recently been subject to improvements to the street environment and pedestrian movement, it remains congested for much of the day, bringing noise and pollution impacts for users of the centre.

The Council will:

- support the character and retail role of Kentish Town by managing the proportions of non-retail premises, in line with the approach set out in the Council's Camden Planning Guidance supplementary planning document;
- deliver further street and public space improvements to enhance conditions for pedestrians and reduce the impact of traffic on the centre, including changes to traffic signals, further pedestrian crossing improvements and new local squares; and
- improve the canopy area next to Kentish Town train station, and investigate the possibility of access via a bridge from the canopy area to Kentish Town Overground Station.

Around £500,000 has been secured from TfL to complete the proposals set out above, which form part of the five-year £4 million *Improving Kentish Town* project which is currently being delivered by the Council.

Hampstead

Although one of the smallest of Camden's centres, Hampstead draws more people from outside the borough than any town centre after Camden Town. Visitors are attracted to the area by its high quality environment, 'village' feel and upmarket shops, cafes and bars. The whole centre is within the Hampstead conservation area and includes many listed buildings, recognising its special character and architectural and historic importance. Opportunities to expand Hampstead centre are limited by environmental constraints and a lack of potential development sites.

The Council will focus on protecting Hampstead's current special character, attractiveness and success as a centre, enabling the centre to continue its role as a retail and leisure destination serving a wide catchment area, as well as the needs of the local population. In order to pursue these aims, the Council will:

- expect development in Hampstead to be of the highest quality design and be sensitive to the area's unique character and heritage assets. Development should be consistent with the Council's Hampstead conservation area statement;
- expect proposals for new or altered shopfronts to preserve or enhance the character and appearance of the centre and respect the original frontages;
- deliver small scale street and public space improvements to enhance conditions for pedestrians, where needed; and
- focus shopping provision in the core of the centre by managing the proportions of non-retail uses – see the Council's Camden Planning Guidance supplementary planning document for more detail on our approach.

Central London Frontages

Central London contains a number of shopping and service areas as part of its diverse mix of uses. These range from larger areas predominantly serving workers and visitors to neighbourhood centres serving local residents to areas of specialist shopping. The main shopping streets in Camden's Central London area have been designated as Central London Frontages. The Council's approach to these areas is set out below.

The Council's Planning Guidance for Central London supplementary document provides detailed information on our approach to food, drink, entertainment, specialist and retail uses in Central London. We will take this into account when assessing relevant planning applications in the area. Core Strategy Policy CS11 (Promoting sustainable and efficient travel) sets out in brief how the Council will improve public spaces across Central London. The Council will deliver improved pedestrian environment and signage along key routes, enhancing links between Camden's Central London area with the rest of the West End, and with key transport hubs, including King's Cross, St Pancras and Euston stations.

Tottenham Court Road/Charing Cross Road

This Central London Frontage operates as an extension to the West End and therefore attracts people from throughout London as well as visitors to the capital. It covers Tottenham Court Road, part of New Oxford Street, and the eastern side of Charing Cross Road as far as Cambridge Circus (the western side of Charing Cross Road falls within the City of Westminster). Tottenham Court Road and part of New Oxford Street lie within the West End Retail Special Policy Area designated in the London Plan.

Tottenham Court Road is well-known for its concentration of furniture and electrical goods stores and the Camden Retail Study 2008 found that it was performing well. The area around Tottenham Court Road Station is identified as a growth area in this Core Strategy and the London Plan. Policies CS1 – *Distribution of growth* and CS2 – *Growth areas* set out the Council's approach to development in the area.

Charing Cross Road also has a specialist retail role, with many book and music shops. The Camden Retail Study highlights the need to improve the pedestrian environment at Charing Cross, particularly towards its northern end.

The Council considers that Tottenham Court Road and Charing Cross Road are both likely to continue in their existing specialist retail roles, but considers that significant improvements to the pedestrian environment will be required to address current accessibility issues and to support increased pedestrian flow as a result of growth and the arrival of Crossrail. This will be particularly important at St Giles Circus, given its key location at the junction of Oxford Street and Tottenham Court Road, and its proximity to Tottenham Court Road station.

The Council will:

- promote and preserve the specialist retail character of Tottenham Court Road and Charing Cross Road by managing the level of shop and food, drink and entertainment uses in these areas, in line with the approach set out in our Planning Guidance for Central London supplementary planning document;
- support the expansion of the Central London Frontage and new retail uses along New Oxford Street, where this would not cause harm to residential amenity. Additional retail growth along the Central London Frontage will be achieved through redevelopment and refurbishment of existing premises;
- pursue significant improvements to the local pedestrian environment, including at St Giles Circus;
- work with Transport for London to investigate opportunities to turn Tottenham Court Road into a two-way road; and
- expect development to include appropriate measures to prevent crime and anti-social behaviour.

Holborn

This comprises the shopping streets of High Holborn/Holborn (from the junction of New Oxford Street to Holborn Circus), and most of Kingsway south of High Holborn. It primarily operates as a town centre for local workers and businesses, with a mix of comparison and convenience stores, banks and building societies, sandwich shops and other food and drink uses. The Holborn area is largely characterised by offices, and large office entrances often break up the frontage. Holborn is identified as a growth area in this Core Strategy and the London Plan. Details of the Council’s approach to development in the area are set out in policies CS1 – *Distribution of growth* and CS2 – *Growth areas*.

The Council will seek to increase the availability of ground floor retail uses at Holborn in order to create more active public spaces and a more cohesive local shopping and service area. The Council will:

- promote the shopping and service character of Holborn Central London Frontage by managing the level of shop and food, drink and entertainment premises in the area, in line with the approach set out in our Planning Guidance for Central London supplementary document;
- manage the night time economy using the Council’s Planning Guidance for Central London supplementary document. In addition, the Council’s Statement of Licensing Policy contains special policies on the cumulative impact of these uses in Holborn, which restrict new premises licences and new club premises certificates;
- expect the provision at ground floor level of new shop premises, or other appropriate uses, as part of the redevelopment of properties that do not currently contribute to the shopping and service character of the Frontage;
- improve pedestrian linkages with the West End through street enhancements;
- work with Transport for London to investigate opportunities to improve or change the gyratory system; and
- expect development to include appropriate measures to prevent crime and anti-social behaviour.

King's Cross/Euston Road

This Central London Frontage is the main commercial area around King's Cross, including parts of Euston Road, King's Cross Road and Grays Inn Road. Active ground floor uses along these roads are not continuous, but are broken up by large uses such as King's Cross and St Pancras stations, the British Library and Camden Town Hall. The eastern and western parts of this Central London Frontage have different characteristics. The eastern part is characterised by small or medium scale buildings with a mix of commercial uses on the ground floor serving local residents, workers and travellers, with residential, hotel and office accommodation above. Pressure for additional food and drink uses here has generally been resisted in order to preserve the character and function of this area, and to prevent unacceptable cumulative impacts. The western part mainly consists of large office and hotel buildings. The ground floors of many of these buildings contain shops or food and drink uses which serve the local worker and hotel populations.

King's Cross and Euston are identified as growth areas in this Core Strategy (see Policy CS1 – *Distribution of growth*) and the London Plan. However, the growth areas are geographically separate to the King's Cross/ Euston Road Central London Frontage (see Map 2). The Council will work with its partners to ensure that growth contributes to improving the quality of the shopping environment along the frontage, particularly at the eastern end, reflecting its position as a gateway to London and a key new business area.

The Council will:

- resist proposals for further loss of retail uses or for additional food, drink and entertainment uses in the eastern part of this Central London Frontage in order to protect the retail role of the frontage and to prevent unacceptable cumulative impacts. The exception to this is the block bounded by Pentonville Road, King's Cross Bridge and St Chad's Place, where there is currently no housing and redevelopment may provide opportunities for food, drink and entertainment activities, as well as retail space;
- encourage the introduction of active ground floor uses, such as shops and other appropriate uses, as part of the redevelopment of existing buildings that currently do not have an active ground floor use;
- permit additional food, drink and entertainment uses in the western part of the Frontage provided that they do not undermine the area's retail function and the mix of uses in the area, in line with the approach set out in Camden's Planning Guidance for Central London supplementary document;
- expect development to include appropriate design measures to prevent crime and anti-social behaviour, in order to make King's Cross and Euston feel safer; and
- seek to improve the street scene along the frontage, particularly at the eastern end, including working with TfL to identify opportunities to enhance the pedestrian environment and crossing opportunities along Euston Road and Pentonville Road.

Neighbourhood Centres

Camden has over 30 neighbourhood centres which cater for the day-to-day shopping and service needs of their local populations. They contain a range of uses including shops, food and drinks uses, doctor's and dentist's surgeries and financial and professional services, and often have housing on upper floors. Housing is the Council's preferred use above ground floor level in neighbourhood centres and we will promote the residential use of vacant or underused floors. Commercial and community uses are considered acceptable uses of upper floors providing they do not cause harm to the amenity of existing residents or introduce activity that would prejudice future residential use on other levels or in neighbouring properties.

The Council will seek to retain a strong element of convenience shopping for local residents in Camden's neighbourhood centres and ensure that any development in them does not harm the function, character or success of that centre. We will take into account the individual character of the centre when assessing development proposals but, as a guide, we will resist schemes that would result in less than half of ground floor premises in a neighbourhood centre from being in retail use or in more than three consecutive premises being in non-retail use. We will also take into account any history of vacancy in shop units and the prospect of achieving an alternative occupier for vacant premises.

Applications for food, drink and entertainment uses will be carefully assessed to minimise the impact on local residents and the local area (see above). The Camden Development Policies document contains the Council's detailed policies to manage the impact of food, drink and entertainment uses (see policy DP12).

CS14. Promoting high quality places and conserving our heritage

- 14.1 Camden does not have a single built character but is made up of many diverse areas, each with their own identity. The southern part of the borough, which forms part of Central London, is characterised by a high density built environment and complex mix of uses. The central part of the borough contains several town centres surrounded by areas of medium-density housing and some employment uses. The north of the borough is predominantly residential of a lower density with substantial open space at Hampstead Heath. Throughout the borough there are examples of Camden's unique architectural heritage, with many high quality buildings and places, old and new. This is reflected in our large number of conservation areas and listed buildings, which have been recognised for their special architectural or historic interest.
- 14.2 Our overall strategy is to sustainably manage growth in Camden so it meets our needs for homes, jobs and services in a way that conserves and enhances the features that make the borough such an attractive place to live, work and visit. Policy CS14 plays a key part in achieving this by setting out our approach to conserving and, where possible, enhancing our heritage and valued places, and to ensuring that development is of the highest standard and reflects, and where possible improves, its local area. Policy CS13 above and policy DP22 in Camden Development Policies set out our approach to ensuring that design in the borough is sustainable and that schemes include measures to minimise the effects of, and adapt to, climate change.

CS POLICY

CS14 – Promoting high quality places and conserving our heritage

The Council will ensure that Camden's places and buildings are attractive, safe and easy to use by:

- a) requiring development of the highest standard of design that respects local context and character;
- b) preserving and enhancing Camden's rich and diverse heritage assets and their settings, including conservation areas, listed buildings, archaeological remains, scheduled ancient monuments and historic parks and gardens;
- c) promoting high quality landscaping and works to streets and public spaces;
- d) seeking the highest standards of access in all buildings and places and requiring schemes to be designed to be inclusive and accessible;
- e) protecting important views of St Paul's Cathedral and the Palace of Westminster from sites inside and outside the borough and protecting important local views.

Excellence in design

- 14.3 Camden has many special and unique places and historic and modern buildings of the highest quality. As well as preserving this rich heritage, we should also be contributing to it by making sure that we create buildings of equally high quality that will be appreciated by future generations. The design of the places and buildings that make up our local environment affects us all and our quality of life. High quality design is visually interesting and attractive but it is not just about what things look like. Good design makes places that put people first, are welcoming, feel safe and are enjoyable and easy to use for everyone, whether they are living in, working in or just passing through the borough.

- 14.4 Development schemes should improve the quality of buildings, landscaping and the street environment and, through this, improve the experience of the borough for residents and visitors. The Council will therefore insist on high quality design throughout the borough. In accordance with government guidance in Planning Policy Statement (PPS) 1 – *Delivering Sustainable Development* we will not accept design that is considered inappropriate to its context or which fails to take opportunities to improve the character and quality of an area and the way it functions. Please see Camden Development Policies (policy DP24) for more detailed guidance on our approach to the design of new development and alterations and extensions. When assessing design, we will also take into account government/CABE guidance *By Design – Urban Design in the planning system: towards better practice* and our own Camden Planning Guidance supplementary document.
- 14.5 The Council is working with its partners to promote and celebrate excellence in design and improve public buildings, landscaping and the street environment; for example through the Camden Design Initiative, which seeks to improve public space and the built environment and encourage involvement, awareness and understanding of good design, including the bi-annual Camden Design Awards, which recognise high quality and innovative designs.
- 14.6 Good design is safe and accessible, and responds flexibly to the needs of its users. It creates buildings that have minimal negative impact on the environment, during construction and beyond. The construction and use of buildings currently accounts for around half of national carbon emissions and it is therefore vital that new and redeveloped buildings are designed to have a beneficial impact on their environment. See CS13 – *Tackling climate change through promoting higher environmental standards* and CS17 – *Making Camden a safer place* for our approach to these matters.
- 14.7 High quality design also takes account of its surroundings and what is distinctive and valued about the local area. Camden is made up of a diversity of areas, each with their own distinctive character, created by many elements such as architectural style and layout, social and economic history, landscaping and mix of uses – as summarised in the description of Camden’s character below. As Camden is a densely built-up borough where most development involves the replacement, extension or conversion of existing buildings, taking account of context and local character is particularly important. The Council will therefore expect the design of buildings and places to respond to the local area and its defining characteristics and reinforce or, if appropriate, create local distinctiveness.
- 14.8 While tall buildings offer the opportunity for intensive use, their siting and design should be carefully considered in order to not detract from the nature of surrounding places and the quality of life for those living and working around them. Applications for tall buildings will be assessed against policy CS14 and policies DP24 – *Securing high quality design* and DP25 – *Conserving Camden’s heritage* in Camden Development Policies, along with the full range of policies on mixed use, sustainability, amenity and microclimate. and other relevant policies. Effect on views, impact on local microclimate and provision of communal and private amenity space will also be important considerations.

Camden's heritage

- 14.9 Camden has a rich architectural heritage with many special places and buildings from throughout Camden's history (see map 6). 39 areas, covering much of the borough, are designated as conservation areas, recognising their special architectural or historic interest and their character and appearance. We have prepared conservation area statements, appraisals and management strategies that provide further guidance on the character of these areas. We will take these documents into account as material considerations when we assess applications for planning permission and conservation area consent in these areas.
- 14.10 Over 5,600 buildings and structures in Camden are nationally listed for their special historical or architectural interest, and 53 of the borough's squares are protected by the London Squares Preservation Act 1931. In addition, 14 open spaces in Camden are on English Heritage's Register of Parks and Gardens of Special Historic Interest. The Council will consult with English Heritage over proposals affecting these parks and gardens. We also encourage the restoration and management of Parks and Gardens of Special Historic Interest and London Squares to enhance their value. Camden also has a generally well-preserved archaeological heritage, with 13 identified archaeological priority areas, although this can be vulnerable to modern development and land use.

Map 6: Heritage

This map is based on Ordnance Survey Material with the permission of Ordnance Survey on behalf of the Controller of Her Majesty's Stationery Office ©. Unauthorised reproduction infringes Crown copyright and may lead to prosecution or civil proceedings. Licence number LA100019728, year 2010.

- 14.11 We have a responsibility to preserve and, where possible, enhance our heritage of important areas and buildings. Policy DP25 in Camden Development Policies provides more detailed guidance on the Council's approach to protecting and enriching the range of features that make up our built heritage.
- 14.12 Architectural detail, materials, colour and structures such as walls can make a significant contribution to the appearance of an area, but can often be altered without the need for planning permission. Cumulatively, many minor building works can gradually erode the quality of an area and undermine the quality of conservation areas. We will therefore make use of 'Article 4 Directions' in appropriate locations to bring some minor works under planning control. We are intending to introduce such measures in the conservation areas of Belsize, Hampstead, and Swiss Cottage, where loss of historic character through cumulative change is apparent. Primrose Hill conservation area already benefits from a comprehensive Article 4 Direction, which has helped to retain its high quality historic character.

Landscaping and public realm

- 14.13 The quality of our streets and public spaces affects the quality of all our lives. We enjoy being in and passing through attractive, clean and well-maintained places, but are discouraged from walking in and through areas with a poor environment. An enhanced public realm should integrate transport and land use, contribute to improved walking and cycling environments, respect and reinforce local identity and character, attract people to the area and encourage the use of streets and public spaces to create diverse, vibrant and lively places.
- 14.14 The Council is committed to improving Camden's streets and public spaces and has carried out many improvement schemes with many more ongoing and planned. We have produced a Camden Streetscape Design Manual to raise the standard of street works throughout the borough. This sets standards for our own works and provides guidance for other agencies. It encourages respect for local character and promotes high quality, clutter-free design to make streets and public places that are safe and easy to use for all.
- 14.15 A number of studies on streets and spaces have been produced, particularly for the south of the borough (e.g. Bloomsbury, King's Cross and St Giles/Tottenham Court Road). These have been commissioned and funded by a range of organisations (including TfL, LDA, Design for London and UCL) sometimes in partnership with the Council. It is procedurally difficult for the Council to adopt these non-statutory documents as formal planning or other guidance. We will therefore look to draw on the best of this work to create a long-term vision for these areas, emphasising local character and providing a high quality environment for walking, which is formally agreed by the Council.
- 14.16 In order to improve the environment for walking in the borough, Camden is committed to the 'Legible London' concept which aims to improve how easily pedestrians can understand the layout of the capital and find their way around by introducing clear and consistent signage and maps. The programme has begun in Covent Garden and Bloomsbury, and future schemes are anticipated around the borough. Camden has also established a 'Place Shaping Board' to consider the most appropriate ways to shape the services, facilities, infrastructure and public realm to meet the needs of current and future populations (see section 4 – *Delivering and Monitoring the Core Strategy*).
- 14.17 Further information on measures being taken by the Council and its partners to improve the quality of our streets and public places is included in CS2 – *Growth areas*, CS8 – *Promoting Camden's centres and shops*, CS11 – *Promoting sustainable and efficient travel*, CS15 – *Protecting and improving our parks and open spaces and encouraging biodiversity*, and CS17 – *Making Camden a safer place*.
- 14.18 High quality landscaping plays an important role in the attractiveness and character of our surroundings. It can improve the setting of buildings, bring trees and other greenery into built-up areas to relieve the hard landscaping and provide shade, and provide habitats for wildlife. The Council will expect development schemes to provide a high standard of landscaping and boundary features, such as walls and fences. We will encourage appropriate use of landscaping in the form of 'green roofs', 'brown roofs' and 'green walls' which have a number of environmental benefits (e.g. in providing wildlife habitats, in helping to cool and insulate buildings and in retaining water, helping to

reduce flooding), as well as being visually attractive. More detail on our approach to landscaping is set out in the Council's Camden Planning Guidance supplementary document and policy DP22 in Camden Development Policies.

Access

- 14.19 Good access benefits everyone. However, many people are disadvantaged by poor access to facilities and vulnerable and disadvantaged groups, such as the elderly and disabled people, can be particularly affected. Poor access can be caused by difficulties in reaching facilities or by difficulties in using the facilities themselves. The Council requires new buildings and spaces to be inclusive and accessible to all. As accessibility is influenced by perceptions as well as physical factors, buildings should also be designed to appear, as well as be, fully accessible. The Council will require Design and Access Statements for developments to show how the principles of inclusive design, ensuring access for all, have been integrated into the proposed development, and how inclusion will be maintained and managed.
- 14.20 Making roads and pavements and the spaces between buildings fully accessible is as important as making the buildings themselves accessible. The Council will seek improvements for all pedestrians to ensure good quality access and circulation arrangements, including improvement to existing routes and footways. The Camden Streetscape Design Manual and our Camden Planning Guidance supplementary document provide more detailed guidance on this issue.

Views

- 14.21 A number of London's most famous and valued views originate in, or extend into, Camden. These are:
- views of St Paul's Cathedral from Kenwood, Parliament Hill and Primrose Hill;
 - views of the Palace of Westminster from Primrose and Parliament Hills; and
 - background views of St Paul's from Greenwich and Blackheath.
- 14.22 The Council will protect these views in accordance with London-wide policy and will resist proposals that would harm them. Where existing buildings that affect a view are redeveloped it is expected that any replacement building will be of a height that does not harm the view. The current framework for protecting these views is set by the London Plan (policies 4B.16 – 4B.18) and the Mayor's London View Management Framework supplementary planning guidance.
- 14.23 The Council will also consider the impact of a scheme, in terms of the townscape, landscape and skyline, on the whole extent of a view ('panorama'), not just the area in the view corridor. Developments should not detract from the panorama as a whole and should fit in with the prevailing pattern of buildings and spaces. They should seek to avoid buildings that tightly define the edges of the viewing corridors and not create a crowding effect around the landmark.
- 14.24 The Council will also seek to protect locally important views that contribute to the interest and character of the borough. These may include:
- views of and from large public parks and open spaces, such as Hampstead Heath, Kenwood Estate, Primrose Hill and Regent's Park, including panoramic views, as well as views of London Squares and historic parks and gardens;
 - views relating to Regent's Canal;
 - views into and from conservation areas; and
 - views of listed and landmark buildings and monuments and statutes (for example, Centrepoint, St Stephen's, Rosslyn Hill and St George's, Bloomsbury).
- 14.25 We will seek to ensure that development is compatible with such views in terms of setting, scale and massing and will resist proposals that we consider would cause harm to them. Development will not generally be acceptable if it obstructs important views or skylines, appears too close or too high in relation to a landmark or impairs outlines that form part of the view. Further guidance on important local views is set out in our supplementary planning documents, for example in individual conservation area statements, appraisals and management strategies and the Planning Framework for the Tottenham Court Road Station and St Giles High Street Area.

Camden's character

Camden is characterised by a great richness and variety in its built and natural environment, with a valuable heritage of local, national and international significance. The following section describes the places, buildings and features that give Camden its distinctive character.

The southern part of the borough is where most of Camden's future growth will take place. It forms part of Central London and has a richly varied and dense character. The planned Georgian streets and squares (e.g. Bedford, Russell, Fitzroy) of Bloomsbury are evidence of the early expansion of London in a form that was architecturally groundbreaking. Modest mews developments to the rear of the terraces contrast in scale and are a particularly characteristic type here and elsewhere in the borough. Regents Park and Nash's 1820s residential development sit at the south western boundary of the borough, contrasting with the earlier Georgian developments in the area.

King's Cross and Euston are parts of the borough that are expected to experience the most change and development over the next fifteen years. Railways have had a significant impact on the appearance of the borough from the 19th century to the present day. These brought monumental architecture and inward migration to the borough and their viaducts, cuttings, tunnels and buildings still affect the shape of development in many parts of Camden, in particular to the north of Euston Road. King's Cross was the largest station in England when it opened and is the earliest great London terminus still intact in its original form. St Pancras (by George Gilbert Scott), now the new London terminus for Eurostar, can claim to be Britain's most impressive station in terms of both architecture and engineering and the station's dramatic roof line forms an important local landmark. Euston station, its ancillary accommodation and railway lines have a major impact on the nature of its surroundings and its future redevelopment will create opportunities to improve the local environment and links between neighbouring areas.

The Inns of Court were some of the earliest establishments in the southern part of the borough. The historic buildings, courtyards and squares of Lincoln's Inn and Gray's Inn give a distinctive atmosphere to this part of Camden, and create oases away from surrounding busy roads. Camden's Central London area also contains Seven Dials with its unusual star-shaped street layout and sundial pillar and the brick, semi-industrial buildings and intimate spaces of Hatton Garden, which were developed in the 19th century to house the workshops and offices of the jewellery trade. The area remains an internationally significant jewellery quarter.

Camden is home to a large number of further education establishments and most are located in the southern part of the borough, including the University of London, London School of Tropical Medicine, Central St Martin's College of Art and Design and the Royal Academy of Dramatic Art. These play a significant role in shaping the character and appearance of this part of the borough. The south of the borough also houses a number of nationally important hospitals and medical research institutions, including Great Ormond Street Hospital, the National Hospital for Neurology and Neurosurgery and the Wellcome Trust.

The town centres of Camden Town, Kentish Town and Kilburn High Road are key elements in **the central part of the borough**. These centres developed in a piecemeal fashion along historic routes into London. They are now marked by continuous, close grained development with commercial units at ground floor level on either side of the road, with terraced housing of a similar density on the streets to the east and west, and little open space. Buildings types are generally consistent in appearance, and public houses are frequent landmarks, which echo the original inns and travellers rests along the historic routes. There is a narrow range of scale and height, and dwellings usually have small gardens to front and rear. Camden Town is strongly characterised by its markets and entertainment. These create a strong draw for tourists and influence the style and appearance of development, which is in many cases colourful and individual.

The areas between these major roads and town centres are characterised by speculative, residential development from the mid to late 19th century for the then new middle classes. These show a variety of distinctive architectural forms and scales, with detached and semi-detached houses in classical Italianate form in Belsize and an eclectic variety of styles including neo-Gothic, Queen Anne, Domestic Revival, Arts & Crafts in Fitzjohns/Netherhall, Redington/Frognaal and South Hampstead/Swiss Cottage. Gospel Oak, West Hampstead and the southern parts of Dartmouth Park were developed to a higher density with terraced houses, smaller gardens and have a more urban feel than Camden's other residential areas.

Social housing schemes are also an important element in the borough's built environment. St Andrews House on Saffron Hill is the oldest surviving public housing block in London whilst early 20th century examples include the London County Council's Bourne Estate on Leather Lane. The LLC's Ossulston Estate is considered the most important inner-city estate of the inter-war period. Post-war examples illustrate an architecturally ambitious programme of housing schemes by Camden Council following its creation in 1965, many of which are listed. The characteristic form was a megastructure of stepped terraces. This low rise, high density approach reflected traditional terraced housing, but provided light, privacy and private open space for all levels of accommodation. Examples are Brunswick Centre, and the estates of Fleet Road, Alexandra Road, Maiden Lane and Highgate New Town.

The Regent's Canal runs through the centre of the borough. Although it is often hidden from surrounding areas, it provides an area of nature conservation interest and amenity space along its course through King's Cross and Camden Town to Regent's Park.

The northern part of the borough benefits from the presence of the large open space of Hampstead Heath, which provides amenity and leisure space, a verdant setting to the surrounding development and famous views across London. Hampstead and Highgate are derived from medieval hamlets and have clearly defined village centres which reflect their origins. They have a variety of building types from cottages and terraces to detached houses and grand residences, with a generally densely packed, high quality urban grain of a range of styles, scales and ages. Both areas contain many high quality, architect-designed houses from the 19th and 20th centuries, many of which have become important parts of the local heritage and are listed for their national significance.
