2017/0081/P	Jameel Khokhar	50 Compayne Gardens flat 3	19/02/2017 11:04:48	OBJEMAIL	<p>I own flat 3 at 50 Compayne Gardens.</p> <p>There will be a lot of noise, dust and disruption to the flat which will cause issues as the tenants work from home.</p> <p>The demolition and the rebuilding of the extension will be dangerous as children play outside and the height of the building will block out light from the sun in the afternoon.</p> <p>In addition, it will be extremely dangerous when rebuilding. I also understand that there will be many trucks and other construction vehicles driving through road right in front of the house which will be dangerous.</p> <p>I object to the application based on: 1. height and length of the extension based on conservation area; 2. the amount of disruption to the neighbouring flats in the houses and other residences; 3. the traffic and the pollution from the demolition and rebuilding; 4. the danger to the residents who live around the area impacting on their wellbeing.</p> <p>I also understand there is planning for an outhouse. I don't think that this together with the extension will make living in the house whilst the construction is going on dangerous, loud and extremely unpleasant for the other residents.</p> <p>If the full application does go ahead, I would like to request the following from the owner:</p> <ol style="list-style-type: none"><li>1. A full time team to control the speed and timing of the vehicles – I am scared that kids will be hurt as the big trucks go down the street at speed. – A speed monitoring and fining system</li><li>2. A pollution monitor to limit the amount of dust and other dangerous materials which could impact health and well being</li><li>3. A onsite construction supervisor where complaints can be made and not a construction company team as they will just ignore these urgent immediate issues</li></ol>
