2017/0705/P	Matthew Nelson	41 Regent's Park Road	22/02/2017 09:06:59	OBJLETTE R	The back of my property faces this mews. The mews has recently endured roughly two years (or more) of extremely noisy and disruptive excavation and construction on a very large house at the eastern corner of the mews. This project threatens much more noise and disruption. It also threatens to further crowd the rather narrow mews with a 'front extension' (and bin storage). Please oppose these elements of the application, i.e. the basement excavation and the front extension!
