

Design & Access Statement      25 Dartmouth Park Road 1 SU  
Application for 2 Storey Rear Extension  
Basement and Ground Floor Maisonette  
Terraced Property three flats

**Design & Access Statement 25A Dartmouth Park Road NW5 1SU**

**Use**

Numbers 25 and 23 Dartmouth Park Road are two of five terraced dwellings on the South Side of Dartmouth Park Road a wide street linking Dartmouth Park Hill and Highgate Road. Number No 25 the East end of the terrace of five and the subject of this application is divided into three flats, a basement and ground floor maisonette and two single floor flats above, one on the first floor and one on the second floor. Entrance to the upper flats is from the main front door set centrally approximately 5.5m from the main front boundary wall and up a half a level from street Ground level. The entrance to the lower maisonette is via a separate entrance on the side passageway separating numbers 25 and 27 and down approximately two steps. The maisonette consists of two floors and has two bedrooms and a box room on the basement floor and a small bathroom. The Ground floor has a kitchen and dining area to the rear and a front living room.

The property was built around 1890 to originally form a family home. Number 25 is owned by Camden Council.

The council was recently approached by the lessee to see if they would be prepared to lease the additional land required for a 3m extension over two floors with a modest 2m patio incorporated into the maisonettes demise. The council have formally agreed to this sale subject to the usual planning and building regulation approvals. Conditions as set out in Leasehold document from Cherelle Brown Leasehold Officer Camden.

Thus the proposal is for an extension to form a modest 3ml back addition over two storeys with a structural glass conservatory to the 23 side to maintain the pattern of two and three storey rear additions closet blocks on this South side of the road. The leaseholders truly like the area have the use of the large rear garden but do not have enough space for their expanding family. They cannot afford to move to a larger space in the same area.

So the proposal is to form two bathrooms and four bedrooms on the basement floor, move the entrance door towards the front of the side passageway to create space for bedroom 3 and a master bathroom under the front entrance with an additional internal bathroom. The Ground floor would have an all glass conservatory and a kitchen extension to the rear with the dining room/living space towards the front of the property.

**Amount**

The proposals will provide additional 18msq space on the ground and 18msq on the first floor

A total of 36msq additional space with 12.4msq of rear patio incorporated within the demise. The council's valuation department has agreed to this outline scheme.

**Layout**

The proposal would necessitate the three metre extension formation over the two floors respecting CPG1 where the intention is to keep the proposal secondary to the host building as set out in CPG4 respecting the original design proportions. The basement floor entrance would be moved towards the front of the building and the existing internal

stairs between the basement and ground also slid forward. This would allow for a larger Bedroom 3 and Master Bathroom 1. The new rear addition would house the two new bedrooms 2 and 4. The front master bedroom would be enlarged to form a bigger bedroom and dressing area. There would be an additional bathroom internally for the use of the two children's bedrooms 2 and 4. On the ground floor the old internal entrance hall would form a new cloakroom. The existing kitchen would be extended into the new extension on the 27 side and there would be a structural glass conservatory on the 23 side. This will be a glass construction in order to cause no loss of amenity to the adjacent property and to retain the look of the historic pattern of closet extension that have received permission and are repeated further up and down this side of the road. This would allow the extension to be read as a separate volume.

The rear elevation cannot be seen from any of the surrounding streets or Belgate Mews. Most of the surrounding properties have been substantially altered at the rear some with 6.5m rear extensions and most with 2 storey rear extensions.

### **Scale**

The intention of the proposal is to preserve and enhance the rear elevation and the rear windows will be the original ones overhauled and reused in the same positions with cambered soldier brick arches and matching second hand stock brickwork. The intention is to satisfy the requirements of CS14 and DP24 with respect to local context and a high standard of design to both preserve and enhance the conservation area as set out in DP25 and CPG1. The rear extension is secondary to the building being extended as discussed in CPG4. The intention of the conservatory is to keep the closet block reading as the main extension with the transparent and lightweight structural glazed conservatory forming minimal impact on the neighbours and the overall elevation. The existing first floor balcony on number 23 which extends a further 1.3M from the proposal at number 25A as existing takes away all privacy from the garden and allows overlooking back into number 25A. The proposed opaque glazed boundary wall set back from the party wall line is an attempt to redress this balance and provide a further opportunity for the existing planting to form a natural barrier between the properties.

### **Landscaping**

The proposals would require no additional landscaping over and above that that has been carried out on site already. There will be a planting scheme for the rear side path flower bed and a York stone paving to the new 2M demised patio to the rear. The intention is to preserve the planting on the 23 side and train it between the two boundary walls. There are no alterations proposed to the front landscaping. There is adequate scooter and bicycle parking in the forecourt already.

### **Appearance**

The proposals would involve no alteration to the external front and the appearance is discussed in Scale above. The new rear addition roof will be a fibreglass roof covered in An upside down construction with a sedum green roof. All materials will match existing.

**Access**

Access at the front of the property and flats B and C would remain the same with the existing front central path leading up steps to the main front door. The front door to flat 25A off the side passageway is repositioned nearer the front of the house and the existing steps will be ramped to facilitate easier pram or wheelchair access.
