2017/1429/T	fcoral Temple	34b Camden Square NW1 9XA London	11/03/2017 15:11:10	JUST	Is it diseased? If not there is really no excuse. We are losing far far too many trees in this conservation area. Camden is known to be one of the most polluted boroughs in London. We need all the trees we can salvage. What is the reason for the removal of this tree? More ghastly building works? Light blockage? I wish to be informed. Unless this tree is fatally diseased I OBJECT, Coral Temple
