| 2017/0618/P     | Miss Ikpasaja    | 32 Matilda Apts<br>4 Earnshaw St<br>London<br>WC2H 8AJ | 14/03/2017 15:06:14 | OBJ      | <p>Below are my main objections to the application:</p> <ol style="list-style-type: none"> <li>1. The new Castlewood House' windows and terraces will look straight into our bedrooms across very narrow Bucknall street,this would violate the privacy of matilda Apartments' residents as well as the privacy of future Castlewood House tenants.</li> <li>2. Power plant on top of the new Castlewood House will affect air quality and create noise nuisance, being so close to our bedrooms/living rooms windows.</li> <li>3. The new Castlewood House will greatly increase in size as well as in height, it will crowd and enclose Central St Giles (Bucknall St side) and leave no open space, which will also affect air quality in the area and deprive Matilda Apartments flats of light.</li> <li>4. The new Castlewood House ,due to it's size and shape of existing buildings, will create wind tunnels on Bucknall St.</li> <li>5. Commercial traffic on Bucknall St will increase and create noise nuisance for Matilda Apartments' residents, especially those on lower floors.</li> <li>6. Social space on the proposed Castlewood House' roof terrace will mean that Matilda Apartments' residents will be disturbed by music and voices at an elevated level outside their bedroom windows .</li> </ol> |
| 2017/0618/P     | Tim Baros        | Flat 31<br>4 Earnshaw Street                           | 14/03/2017 17:17:38 | OBJEMAIL | <p>I live right behind the new development, right on a street called Earnshaw Street, This street is busy enough as it sits right in between Centrepoint and Central St. Giles. However, if the new development at Castlewood House is approved and built, it will cause more congestion and traffic in area where this needs to be reduced. Plus the additional pollution is not healthy for the existing residences. So I oppose this.</p>  |
