Summary of representations (Officer response(s) in italics)	<p><u>A resident living in Russell Square Mansions objected as follows:</u></p> <p>I wish to object to this application on the grounds that the internally illuminated digital screens by reason of their location, size and design and method of illumination would be unduly dominant and visually obtrusive in the street scene, failing to preserve and enhance the character and appearance of the area and harming the setting of the adjacent buildings. This seems contrary to policies CS5 (Managing the impact of growth and development) and CS14 (Promoting high quality places and conserving our heritage).</p>					

Case officer's comments are as follows:

It is accepted that all advertisements are intended to attract attention and that the proposed method of illumination would cause some degree of light spill, however the proposed advertisement is to replace the existing advertising panel that forms part of the structure of the existing bus shelter. The scheme has been revised during the course of the application to reduce the proposal for a double sided digital panel to a single sided panel (facing inwards). Whilst located in a conservation area the bus shelter is located in front of a parade of retail units with associated signage. It is considered that together with the conditions attached to any approved decision notice and a revision to alter the panel to be single-sided and inward facing, on balance, the proposal would not adversely impact the streetscene or the character and appearance of neighbouring buildings.

Please refer to the decision notice which sets out more fully the consideration given to the proposals, basis for the recommendation, and conditions attached to any approval.

Recommendation:- Grant advertisement consent
