2017/1230/P	Katarzyna Balata	Reach view close 59	15/03/2017 14:15:58	OBJ	We will lose the green nature of the canal. Open and sunny section of the canal will experience the overshadowing and negatively affect health of local residents.
2017/1230/P	Olivia Harris	50 Reachview Close London NW10TY	16/03/2017 12:24:15	OBJ	I am concerned that the proposed development will dwarf the surrounding buildings (Reachview Close and historic Royal College Street) and the canal. It will block the light for the residents opposite and the height of the proposed building is likely to create a wind tunnel (I know from running regularly along the canal tow path that this is now a significant problem in other areas which have seen recent high rise development. I do not oppose Bangor Wharf being developed but there is simply no need for it to run to as many stories as proposed at present.
2017/1230/P	Alex Gamez	22 Glencairn Court Lansdown Road Cheltenham GL50 2NB	16/03/2017 17:58:39	OBJ	<p>Dear Sir,</p> <p>Re Bangor Wharf proposed development - Regent Canal.</p> <p>I oppose this proposed development for the following reasons.</p> <p>Loss of light which will inevitably result from building a 6 storey block next to a three storey building and right on the edge of the canal. This will affect the biodiversity, and the loss of light will have a deleterious effect on the people living in the vicinity of the proposed building.</p> <p>The excessive height and monolithic appearance of the proposed buildings are not in keeping with the surroundings.</p> <p>The closeness to the houses on Royal College Street means that their right to privacy will be severely affected.</p> <p>Perhaps if there was a limit to the height of the buildings to 4 storeys, the negative impact would be reduced whilst still allowing much needed housing to be built</p>
