2017/1443/T	Maree Ballantine	12 Upper Park Road Belsize Park NW3 2UP	18/03/2017 13:28:53	COMMNT	Dear Planning Committee,I was disappointed and surprised to see the application to fell 4 healthy established trees in a conservation area with active wildlife. These trees are an important part of our local habitat for air quality, filtering nitrogen and other pollutants from Harvestock Hill road traffic. They provide a sense of wellbeing with nature and for the birdlife these trees attract.I would hope that suitable plans are in place to protect the natural habitat and any new garden works are sensitive to this loss of established beautiful trees.Thank you.
