Other;

Area to lower entrance on Croftdown Rd Tree T9 on the plan

Cedar atlantica; The tree is situated in an area that overhangs a seating area for the children and an access road to the side of one of the buildings, this is also used by the children and staff to access different parts of the building. The tree recently shed one of its larger limbs, blocking the road and hitting a parked van. A number of smaller branches have been shed over recent years leading to a number of wounds, please see pictures. Due to the trees position I believe it should be removed, however the school and people in the neighbouring properties would like to retain it. A possibility is reducing it but this would destroy its appearance

The application is therefore to fell it or possibly reduce it removing a damaged limb at the same time, please refer to photographs

Yours sincerely

C. HOWARD
