2017/0323/P	Redington Frogmal Asociation	Nancy Mayo Secretary	23/03/2017 22:36:28	OBJ	Redington Frogmal Association objects to the excavation of an underground parking facility on the grounds that it will increase the capacity for car parking and promote vehicle use. We are also concerned about the potential to divert the course of subterranean water, due to the presence of an underground aquifer. If Camden is minded to grant consent, we should wish to see 50% of the car parking forecourt returned to front garden, with a front boundary hedge, in order to remove the negative impact on the Conservation Area of the existing off-street parking arrangement.
