2017/1260/P	K Field	3-5 Charles Place	30/03/2017 09:11:45	SUPPRT	<p>Dear planning dept.</p> <p>I am comfortable that the proposed glazed addition to the building will not have a detrimental effect on the mews (Charles Place). Even at its increased height. In fact it sounds rather nice, particularly retaining the original brick and sash window details visible through the glass. It will help smarten up that section of the mews, which helps all those who live/work there.</p> <p>Specifically with the rear elevations of the Drummond Street terrace, there is no consistency in treatment which warrants any restriction in my view on this particular property.</p> <p>Thanks for listening. Kim</p>
