

# TREE INSPECTION FORM

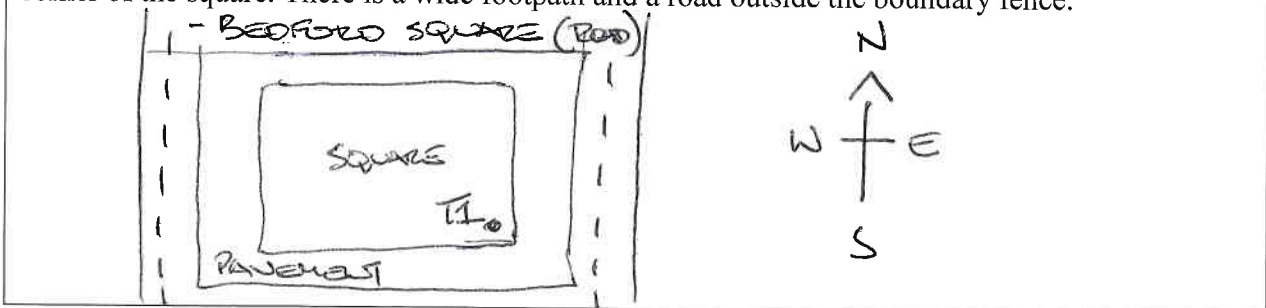

Document 02

Quote 9276

LOCATION	Bedford Square, London, WC1B 3JA
DATE	27/03/17
INSPECTOR	Bruce Blackman BSc (Hons), Cert Arb,

## TREE LOCATION/SKETCH PLAN

For a location plan see below. The tree is located near the boundary fence within the south east corner of the square. There is a wide footpath and a road outside the boundary fence.

## TREE SCHEDULE

Tree no.	Species	Height (metres)	Spread (metres)	Age
T1	Ilex aquifolium	14	4	Mature

TREE CONDITION

Tree no.	Condition	Targets	Hazard Assessment
T1	Fair	Footpath, Road,	The tree is leaning over the footpath and road. There are signs that the lean is progressive due to movement of the root ball which is bulging/lifting. Also the tree has loose bark on the upper side and vertical cracks representing potential shear forces in the stem. <b>Given the high use of the area I believe this tree is a high risk of failure and potential for injury/damage.</b>

RECOMMENDATIONS

Tree no.	Priority	Specification	Notes
T1	Emergency	Fell
