safety

Running on
at least 8
stainless steel
wheels

SEE ahead. Orama is vision. A hallucination. Can you really see it? Orama provides an exceptional visual experience, minimizing the frames and producing a flawless optical balance between the interior and exterior area. An overall effect of unique luminous ambience and a closer approach to the elements of nature.

THROUGH cutting edge technology and a team with over 30 years of experience and competence, we create innovative, high quality systems for large surface sliding windows, always paying attention to the details. We ensure low energy consumption, water and wind resistance, safety and smooth and silent sliding, offering ideal solutions even at the planning stage of the project.

ELEGANCE is the outcome, inspired by our love for minimalistic architectural design and the modern need to simplify the living space. Feel the comfort of a limpid and transparent artifact that allows daylight to fill the room and highlights the warmth of home.
