RE: Planning applications. Request for comments. Installation of 1 x telephone box Subject:

x 46 applications

2017 Phone Box Working Sheet.xls; Pedestrian Comfort Guidance - Appendix B.PDF Attachments:

Categories: Yellow Category

Hi Oluwaseyi,

We normally work on the basis of 21 days to respond to planning applications so I was hoping to try and get you something on this today as I'm off on Monday. However, it looks like a decision has already been reached on the applications. In case its helpful, I've attached your spreadsheet which shows as far as I got with the assessment. We've been trying to take a consistent approach to these applications as we've received them across several boroughs, so the first point is that we don't feel that the supporting information is sufficiently detailed to be able to properly assess the impacts of the proposals. None of the plans submitted are dimensioned, and none show existing street furniture. We've therefore had to make some assumptions in terms of distance from the kerb edge, distance from the back of footway and proximity to other things on the footway, but notwithstanding any other points we would have objected to all the applications on the grounds of insufficient information being provided in any case.

Secondly, we've looked to assess the impacts of the proposals on footway capacity in accordance with TfL's Pedestrian Comfort Guidance, and in particular the minimum footway requirements set out in Appendix B, which I've attached.

Please let me know if it would be useful for us to provide comments on the remaining applications (in case of appeal etc) or whether you want us to expand on any particular points, or provide plans etc, for example around Swiss Cottage.

Regards

Mark

Mark Day I Principal Technical Planner (Central)

Subject: Planning applications. Request for comments. Installation of 1 x telephone box x 46 applications

Dear Sir/Madam

We have received 46 x applications (GPDO prior approval) for 'Installation of 1 x telephone box' in various location throughout the borough.

Rather than consult you on each of these individually I thought I would send you the list in an email. Please see the attached excel spreadsheet for all application references and site addresses.

3 x officers shall be dealing with these based on general areas. Officer names are on the spreadsheet and cc'd to this e-mail.

We have registered the applications, and I have attached a full set of supporting information received with one of these applications types, apart from site address information, all of them are the same. Full documents for all sites are available to view online.

We would appreciate it if you could provide comments for these applications. I understand that your comments may be duplicated for each site, hence this e-mail. We are more than happy to receive 1 comment to cover all applications. Should there be any specific concerns relating to any sites, please let us know?

Should you have any general queries, please contact any of the officers cc'd. If your enquiry relates to a specific site, please contact the appropriate officer from the spreadsheet.

FYI – because of the nature of these GPDO prior approval applications we must provide decisions within 56 days of receipt (21/02/2017), otherwise consent is deemed approved. Therefore we would appreciate comments asap.

Kind regards,

Oluwaseyi Enirayetan Planning Technician Regeneration and Planning Supporting Communities London Borough of Camden
