Summary of consultation responses:	<p><u>A site notice was displayed on 08/03/2017 and expired on 29/03/2017.</u></p> <p>No responses were received from neighbours.</p> <p>Metropolitan Police – Designing Out Crime Officer objects on the following grounds:</p> <ul style="list-style-type: none"> - The proposed telephone kiosk may be abused for the purposes of crime and anti-social behaviour (ASB); - It will cause a reduction in surveillance in the area. An offender may use this telephone kiosk to avoid CCTV or casual surveillance from other users of the street; - It may provide an opportunity for an offender to loiter in the area; - It may also be abused by the posting of prostitute cards. <p>Transport Strategy object as follows:</p> <ul style="list-style-type: none"> - The application is contrary to policies CS11 (Promoting sustainable and efficient travel), DP21 (Development connecting to the highway network), and DP17 (Walking, cycling and public transport), Camden Planning Guidance CPG7 (Transport), Camden’s Streetscape Design Manual, and TfL’s Pedestrian Comfort Guidance. The application is also situated in close proximity to the proposed scheme for the re-development of Euston Road and the King’s Cross Gyratory. The proposal is therefore deemed unacceptable. <p>TfL object as follows:</p> <ul style="list-style-type: none"> - We don’t feel that the supporting information is sufficiently detailed to be able to properly assess the impacts of the proposals. None of the plans submitted are dimensioned, and none show existing street furniture. We’ve therefore had to make some assumptions in terms of distance from the kerb edge, distance from the back of footway and proximity to other things on the footway. Recommend refusal on the grounds of insufficient information being provided. - High pedestrian flow due to proximity with Euston, Kings Cross and St Pancras stations - Proposal would reduce footway width to below 3.3m recommended by Pedestrian Comfort Guidance. - Conflicts with TfL aspirations to make it easier to walk along Euston Road and provide additional footway capacity to support anticipated levels of growth and development. 					

**CAAC/Local Group
comments:**

No responses were received.

Site Description

The application site comprises of an area of the footway directly adjacent to No. 101 Euston Road, on the southern side of Euston Road.

The site lies within the Central London Area and is part of Transport for London's (TfL's) Road Network (TLRN). The site does not fall within a conservation area and is not adjacent to any listed buildings.

Camden Local Plan Submission Draft 2016

The emerging Local Plan is reaching the final stages of its public examination. Consultation on proposed modifications to the Submission Draft Local Plan began on 30 January and ended on 13 March 2017. The modifications have been proposed in response to Inspector's comments during the examination and seek to ensure that the Inspector can find the plan 'sound' subject to the modifications being made to the Plan. The Local Plan at this stage is a material consideration in decision making, but pending publication of the Inspector's report into the examination only has limited weight.

T1 Prioritising walking, cycling and public transport

TfL Pedestrian Comfort Guidance (PCG) 2010

Assessment

1.0 Proposal

1.1 Confirmation is sought as to whether the installation of a telephone box would require prior approval under Part 24 of Schedule 2 of the GPDO. The order permits the Council to only consider matters of siting and appearance in determining GPDO prior approval applications. The potential impact on crime and public safety are relevant considerations under siting.

1.2 The box would measure 1.3m in width, 1.1m in depth and 2.6m in height, and would be located on the southern pedestrian footway along Euston Road.

1.3 It would have a steel frame and casings with 8mm clear polycarbonate toughened glass on two sides, and a solar panel on the roof.

2.0 Assessment

2.1 Policy DP21 states that the Council will expect works affecting the highway network to address the needs of wheelchair users, people with sight impairments and other vulnerable users; to avoid causing harm to highway safety or hinder pedestrian movement and avoid unnecessary street clutter; and to contribute to the creation of high quality streets and public spaces. Policy CS11 paragraphs 11.8-11.12 specifically detail the importance of encouraging more walking, and Policy DP21 paragraph 21.21 emphasises that it is important that development does not hinder pedestrian movement, and states that the Council will not support proposals that involve the provision of additional street furniture that is not of benefit to highway users.

2.2 Policy DP17 states that the Council will promote walking, cycling and public transport use and that development should make suitable provision for pedestrians, cyclists and public transport where appropriate, and paragraph 17.4 highlights that footpaths need to be wide enough for the number of people who will use them so they do not spill onto roads.

2.3 Paragraph 8.6 of CPG7 (Transport) seeks improvements to streets and spaces to ensure good quality access and circulation arrangements for all. Ensuring the following:

- Safety of vulnerable road users, including children, elderly people and people with mobility difficulties, sight impairments and other disabilities;
- Maximising pedestrian accessibility and minimising journey times;
- Providing stretches of continuous public footways without public highway crossings;
- Linking to, maintaining, extending and improving the network pedestrian pathways;
- Providing a high quality environment in terms of appearance, design and construction, paying attention to Conservation Areas;
- Use of paving surfaces which enhance ease of movement for vulnerable road users; and,
- Avoiding street clutter and minimising the risk of pedestrian routes being obstructed or narrowed e.g. by pavement parking or by street furniture.

2.4 Camden's Streetscape Design manual – section 3.01 footway width states the following:

- “Clear footway” is not the distance from kerb to boundary wall, but the unobstructed pathway width within the footway;
- 1.8 metres – minimum width needed for two adults passing;
- 3 metres – minimum width for busy pedestrian street though greater widths are usually required;
- Keeping the footway width visually free of street furniture is also important, allowing clear sightlines along the street’.

2.5 Policy CS17 requires development to contribute to community safety and security, and paragraph 17.5 states that the design of streets needs to be accessible, safe and uncluttered, with careful consideration given to the design and location of any street furniture or equipment. Paragraphs 9.26 and 9.27 of CPG1 (Design) advise that the proposed placement of a new phone box needs to be considered to ensure that it has a limited impact on the sightlines of the footway, and that the size of the box should be minimised to limit its impact on the streetscene and to decrease opportunities for crime and anti-social behaviour.

3.0 Siting

3.1 The application site is located on a pavement measuring roughly 4.0m wide. This area of the footway is relatively clear of street furniture and experiences extremely high pedestrian flows, particularly at peak times.

3.2 Section 3.01 of Camden's Streetscape Design Manual requires a minimum unobstructed pathway width within the footway, known as the 'clear footway'. This guidance and Appendix B of TfL's Pedestrian Comfort Guidance, outlines the recommended minimum footway widths for different levels of pedestrian flows. For areas of high levels of pedestrian flow a minimum width of 3.3m is required.

3.3 The proposed telephone box measures 1.325m in width (rounded to 1.4m for robustness). Detailed design drawings that include the orientation and exact proposed positioning of the new telephone box on the pavement have not been submitted and so it is unclear as to how wide the 'clear footway' width would be once the proposed telephone box has been installed. However, Camden's Streetscape Design Manual section 4.01, together with TfL's Pedestrian Comfort Guidance, states that street furniture should be placed a minimum of 0.45m back from the carriageway, therefore the proposal would result in the loss of a minimum of 1.9m of the footway. This would reduce the 'clear footway' to less than the minimum threshold, which would have a detrimental impact on pedestrian comfort, may lead to the discouragement of sustainable travel, and could have an impact on highway safety through interfering with signals, visual obstructions, visibility splays and leading to overcrowding. As such, the proposal would be contrary to Policies CS11, DP21 and DP17 and is

considered unacceptable.

3.4 There are three existing telephone boxes on the northern side of Euston Road opposite the site and no justification has been submitted for the need to install a further one. Given the infrequent use of telephone boxes due to the prevalence of mobile phone use, it is considered that the proposed telephone box would act only as a hindrance to pedestrian movement, adding further clutter to the streetscene rather than providing a public service for the benefit of highways users, contrary to Policy DP21.

3.5 The proposed scheme to reconfigure Euston Road and the King's Cross Gyratory are within the vicinity of the site. The scheme aims to create a high quality place and improve pedestrian comfort and increase the safety of vulnerable road users through providing additional space for walking and cycling. The installation of a new telephone box in this location would add further street clutter to the streetscene, contrary to the aims of the committed scheme, and the resulting reduction in the footway width may discourage active travel. The siting of the proposal is therefore considered to be unacceptable.

4.0 Design and Appearance

4.1 Policy CS14 aims to ensure the highest design standards for developments. Policy DP24 states that the Council will require all developments to be of the highest standard of design and to respect the character, setting, form and scale of neighbouring buildings, its contribution to the public realm, and its impact on wider views and vistas.

4.2 Due to the prominence of the proposal's siting on a relatively clear section of pedestrian footway, it is considered that the proposed development would severely degrade the visual amenity of the area through the creation of further unnecessary street clutter.

4.3 The proposed structure is considered to be a very poor design in terms of size, scale, massing and proposed materials, and is not an appropriate or acceptable addition in this location. It would be an obtrusive piece of street furniture in this location detracting from the streetscene. The stainless steel incongruous design would provide an intrusive addition to the street. Consequently, the proposed kiosk would result in a significant harm to the wider streetscene. As such the proposal would fail to adhere to Policies CS14 and DP24.

5.0 Anti-social behaviour

5.1 With regards to community safety matters, a number of issues have been raised by the Metropolitan Police Crime Prevention Design Advisor. In particular it has been noted that the siting of the proposal on a relatively clear section of the footway would due to the scale and location of the structure add to street clutter and safety issues in terms of crime and anti-social behaviour, through reducing sight lines and casual surveillance in the area, and providing a potential opportunity for an offender to loiter, contrary to Policy CS17 and CPG1 (Design).

6.0 Conclusion

6.1 The proposal would result in unacceptable street clutter, harmful to the character and appearance of the streetscape and to the detriment of pedestrian flows. The proposal, by virtue of its siting and appearance, would fail to reduce opportunities for crime and antisocial behaviour to the detriment of community safety and security, and compromise the safety of those using and servicing the telephone kiosk and is considered unacceptable.

6.2 Having regard to the above it is considered that the prior approval of the Local Planning Authority is required for the siting and appearance of the development under Part 24 of Schedule 2 of the Town & Country Planning (General Permitted Development) Order 1995. It is recommended that

prior approval is refused in this instance, for the reasons given in this report.

7.0 Recommendation

7.1 Refuse Prior Approval
