2017/1230/P	Susan Watling	6 Reachview Close	09/04/2017 21:37:23	OBJ	The loss of the open space to buildings would be detrimental to the wildlife of the canal. Trees and shrubs will also be removed creating a paved uninteresting area instead. Natural light/sun light will be vastly reduced causing a much increased shadowing of a once bright area. This will inevitably affect the wellbeing of visitors and residents. I would like my thoughts considered please.
2017/1230/P	Mihai Evoiu	31 Reachview Close NW1 0TY NW1 0TY	07/04/2017 11:06:34	OBJ	I am worried about the hight and scale of this construction. This will not only hide the view to the terraced houses of Royal College street but will close the view considerably and will tower over the apartments opposite to the canal reducing the amount of direct sunlight greatly.
2017/1230/P	Chris Edwards	16 Lewis Street nw1 8qt nw1 8qt	06/04/2017 10:17:57	OBJ	The development will take create a continuous wall of shadow over the canal at many times during the day, seriously reducing its character as a light and airy leisure feature is certainly a reduction in the quality of the local canal environment.
2017/1230/P	Julien Delile	NW10TY	09/04/2017 10:54:51	OBJ	As a local resident, the reason for our objection is obviously the height of the Bangor Wharf building. Building this 6-storeys immediately on the side of this narrow part of the canal would destroy the harmony of the canal walk and of the local neighbourhood. This part of the canal has a great potential for vibrant improvement and it would be a mistake to make it similar to the section south of the St Pancras Way bridge (which has only 4-storeys building). We would support new developments with reasonable height.
