Subject: Case 2017/0608/P

Good afternoon,

I would like to make representation regarding application Case 2017/0608/P for 47 Cotleigh Road.

I live in the first floor property and have concerns regarding the the effect on the building as a whole (there are only 2 flats in the building). Having looked at the application there is little detail regarding the build, It appears there are 2 floors in the proposal, but no detail on any excavation or plans relating to the entire building. I have concern the building will not be stable enough to hold this and that the foundations will not be strong enough. I haven't objection in principle to an extension at the rear however want to be sure the building standard is not going to cause my property any issue I would like to see full scale architectural plans and details form structural engineers to be sure that my property will not be structurally impacted.

Many thanks for your consideration and I look forward to getting a response regarding this.

Many thanks,

Kate
