

USING BRE DIGEST FOR
PLANNING FOR DAYLIGHT AND
SUNLIGHT

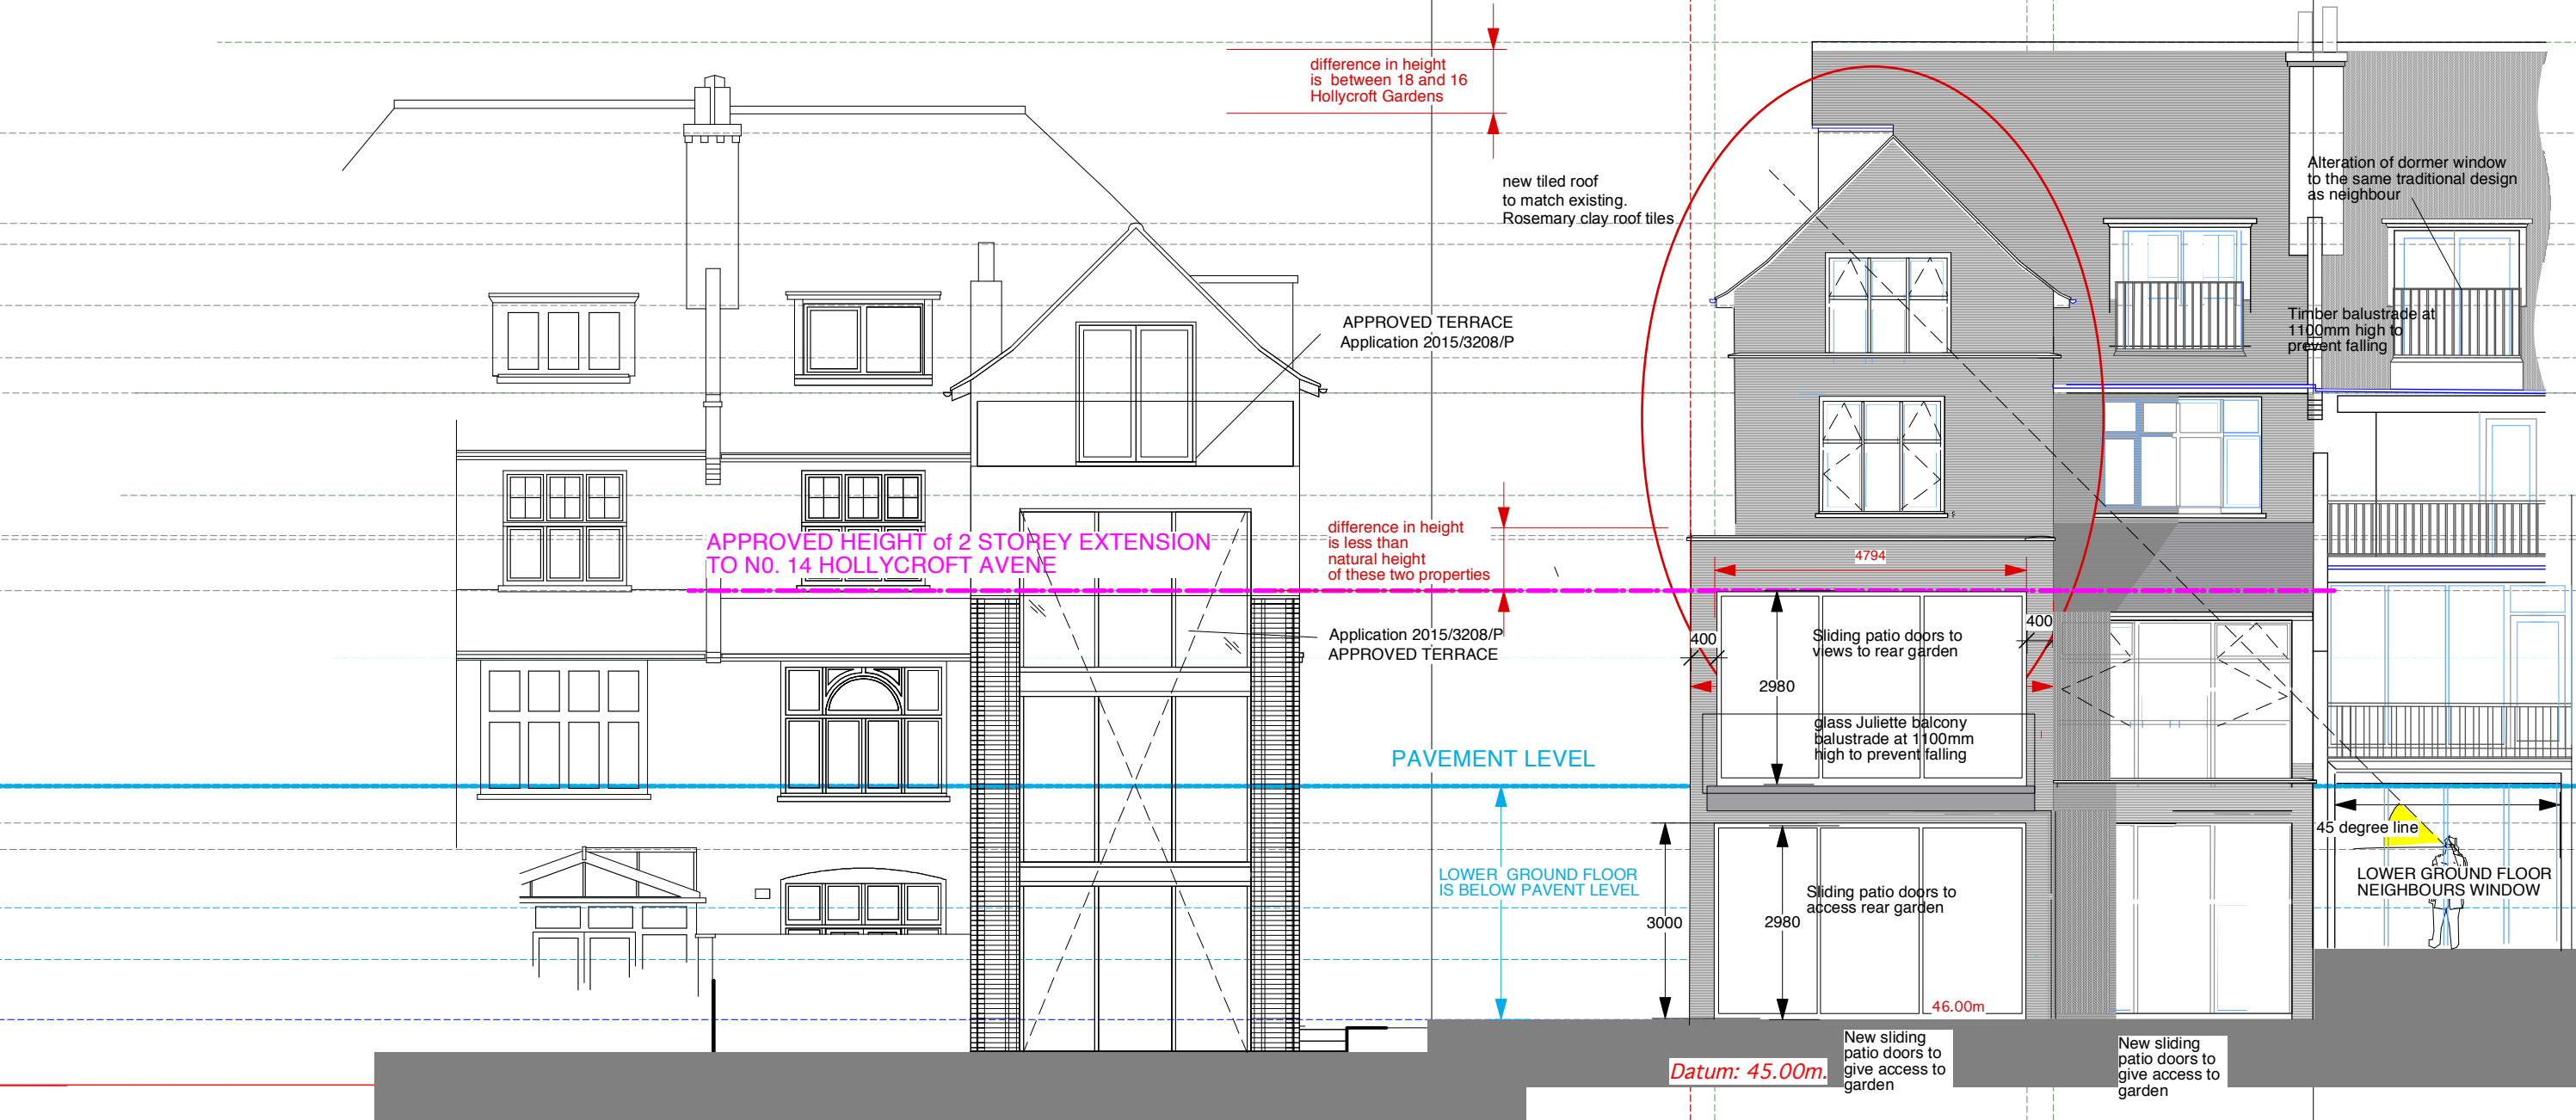

A significant amount of light is likely to be blocked if the centre of the window lies within the 45 degree angle on BOTH plan and elevation.

Here the centre line of the Lower Ground window lies outside the 45 degree angle on elevation to both the LOWER GROUND and GROUND FLOOR rear extension. So the impact of the lower two floors of the proposed extension is likely to be small.

THUS: In this instance the LOWER GROUND and GROUND floor REAR EXTENSION is well within the limit set on the elevation view.

HOWEVER the 45 degree line does cross the FIRST FLOOR and SECOND FLOOR and so this must be looked on plan view to see if the obstruction occurs on the PLAN view
